Declaration of Environmental Professional:

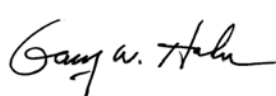

We, Eleanore Ramsey and Gary Hahn, declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in Title 40 of the Code of Federal Regulations (CFR) Part 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in Title 40 CFR Part 312.

ASTM E1527 Standard Practice for Phase I Environmental Site Assessment

Viability of Report

For the purposes of Landowner Liability Protections under the federal Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), a Phase I Environmental Site Assessment conducted in conformance with the American Society for Testing and Materials Practices E1527 is valid for a period of 180 days from the date of completion of the earliest of the following four main components required for meeting *All Appropriate Inquiries* (AAI):

- Interviews with owners, operators, and occupants
- Review of government records
- Visual inspections
- Declaration by the environmental professional

For extended viability beyond 180 days, the above components may be updated within one year of the initial assessment and will be valid for an additional 180 days. If more than one year passes from the date of the initial assessment, a new Phase I Environmental Site Assessment would need to be conducted in order to qualify for the federal protections.

Dates of the Four Main *All Appropriate Inquiries* Components

| | |
|---|-------------------|
| Interviews with Owners, Operators, Occupants | September 2, 2025 |
| Review of Government Records | August 14, 2025 |
| Visual Inspection | August 20, 2025 |
| Declaration by Environmental Professional | September 4, 2025 |
| <i>Viability Expiration:</i> February 10, 2026 | |

In addition to the above components, the required search for recorded environmental cleanup liens and Activity and Use Limitations (which is a *User-Responsibility* and therefore is not within the scope of the Phase I Environmental Site Assessment) must also be conducted within 180 days of and prior to the date of acquisition of the subject property.

1.0 EXECUTIVE SUMMARY

Hahn and Associates, Inc. has performed this Phase I Environmental Site Assessment in conformance with the scope and limitations of the American Society for Testing and Materials Practice E1527-21 at the request of Claquato Cemetery Association. The Phase I Environmental Site Assessment consisted of a Site Reconnaissance, an historical and physical features evaluation of the subject property, an examination of the surrounding land uses, and an environmental database review of the property and of the surrounding land uses. Any exceptions to, or deletions from, this practice are described in Section 11.0 of this report.

As part of the Phase I Environmental Site Assessment, the information obtained was reviewed to evaluate the likely presence of contaminants of concern on the subject property or nearby properties, specifically regarding those that are of a type that may migrate in soil, soil vapor, and/or groundwater. Further, the physical features of the surrounding area were considered in determining the potential for any such contaminants to migrate from contaminated soil, soil vapor, and/or groundwater to the subject property, or within or from the property.

Please note that this section provides a summary of the findings of the Phase I environmental site assessment and some details of the report are not included or fully developed in this summary. Therefore, this report must be read in its entirety for a more complete understanding of the findings, conclusions, and recommendations contained herein.

Subject Property

Claquato Church Property

- 125 Water Street, unincorporated Lewis County near Chehalis, Washington

Site Description

- Size: 0.37 acre
- Current Use: Historical church building (not in use)
- Significant Features: Church Building, Outhouse
- Vicinity Characteristics: Residential usage, unincorporated Lewis County near Chehalis, Washington. The subject property vicinity is known as Claquato.

Site History

- 1858: Existing Church Building built
- 1858 – 1873: Church Building also used as a school (Claquato Academy)
- 1858 – 1930s: Church usage for regular religious services
- At least 1859 – 1880s: Residence (parsonage) located on northern portion of subject property
- 1940s – Present: Church Building used occasionally for small events
- 1953: Significant restoration work occurred
- Unknown – present: Outhouse located on subject property

Site Reconnaissance

The Site Reconnaissance did not identify Recognized Environmental Conditions or Historical Recognized Environmental Conditions

Further, the Site Reconnaissance also did not identify the current or former presence of:

- Underground or aboveground storage tanks
- 55-gallon drums
- Significant quantities of hazardous substances, petroleum products or hazardous waste
- *De Minimis* conditions
- Significant Data Gaps

Other Site Features

Pit Toilets:

- Subject property served by onsite pit toilets

Suspect Asbestos-Containing Materials:

- Existing building constructed 1858 and significant restoration work conducted in 1953: Asbestos was commonly used in building materials prior to the 1980s

Records Review

The review of state and federal environmental records disclosed a number of sites located within a 1.0-mile radius of the subject property that are currently or have previously been under review for environmental issues. However, these sites do not appear to represent a Recognized Environmental Condition for the property at this time.

Conclusions and Recommendations

This Phase I Environmental Site Assessment did not reveal evidence of Recognized Environmental Conditions in connection with the subject property. From the data that was assembled during the course of this investigation, it is the professional opinion of Hahn and Associates, Inc. that further investigatory work in the form of a Phase II Environmental Site Assessment does not appear to be necessary for the subject property.

However, while not Recognized Environmental Conditions under E1527-21, the following information is presented:

1. Based upon the age of the Church Building (built in 1858, with major restoration work conducted in 1953), materials used in its construction may contain asbestos. The age of the Outhouse building could not be determined, and it may also contain asbestos.

Recommendation: It is recommended that an asbestos survey be performed prior to any construction or demolition activities. Areas found to contain asbestos which are in a deteriorated condition should undergo abatement or be repaired by a licensed asbestos contractor.

2. The subject property was served by a pair of on-site pit toilets.

Recommendation: If usage of the pit toilets is to be discontinued, it should be abandoned according to the applicable regulations.

2.0 INTRODUCTION

2.1 Purpose

Claquato Cemetery Association (the Client/User) retained the environmental consulting firm of Hahn and Associates, Inc. (HAI) to perform a Phase I Environmental Site Assessment (ESA) of the Claquato Church property located at 125 Water Street, Chehalis, Lewis County, Washington.

This Phase I ESA was undertaken by the Client/User for the purpose of identifying Recognized Environmental Conditions (RECs) at the property, that is, (1) the presence of *hazardous substances* or *petroleum products* in, on, or at the *subject property* due to a *release* to the *environment*; (2) the likely presence of *hazardous substances* or *petroleum products* in, on, or at the *subject property* due to a *release* or *likely release* to the *environment*; or (3) the presence of *hazardous substances* or *petroleum products* in, on, or at the *subject property* under conditions that pose a *material threat* of a future *release* to the *environment*. A Historical REC (HREC) and/or *de minimis* condition is not a REC. This report is intended to constitute *All Appropriate Inquiries* (AAI) for purposes of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA).

2.2 Detailed Scope-of-Services

The scope of work for this project followed the American Society for Testing and Materials (ASTM) guideline (E1527-21) entitled *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. This scope of work is strictly limited to the scope set forth in ASTM E1527-21 unless specifically noted herein and detailed in the services agreement for this project. The U.S. Environmental Protection Agency (EPA) has stated that the ASTM E1527-21 standard may be used to comply with meeting the objectives and performance factors of 40 Code of Federal Regulations (CFR) Part 312 Standards for *All Appropriate Inquiries, Final Rule* (40 CFR 312.11). All appropriate inquiries must be conducted in compliance with E1527 to obtain protection from potential liability under CERCLA as an innocent landowner, a contiguous property owner, or a bona fide prospective purchaser. Any deviations to or from ASTM E1527-21 are described in Section 11.0 *Deviations*.

In accordance with E1527-21, information on the property under consideration was gathered through the following activities:

- Physical inspection (site visit)
- Observation of the physical features of the property
- Survey of the surrounding land uses
- Interviews of knowledgeable persons, when available and as pertinent, including
 - Current and past owners
 - Current and past operators
 - Current and past occupants
 - Others
- Review of the available historical documents
- Review of recorded environmental cleanup liens and Activity and Use Limitations (AULs), as provided to HAI by the Client/User, for the purpose of CERCLA Landowner Liability Protections
- Reviews of federal, tribal, state, and local government records
- Examination of other pertinent documents, such as, but not limited to, photographs and maps

In accordance with the services agreement for this project (Appendix A) and unless specifically noted herein, the Phase I ESA review and inspection activities did not include items that were outside the scope of ASTM E1527 (also known as non-scope considerations) that may exist on a property that are beyond the scope of E1527, but may warrant consideration by parties to a commercial real estate transaction. Non-scope considerations include certain environmental conditions such as, but not limited to, the following:

- Asbestos
- Lead-Based Paint (LBP)
- Lead in Drinking Water (LIW)
- Electromagnetic Radiation
- Cultural and/or Historical Resources
- Indoor Air Quality (e.g. Vapor Intrusion, Radon, Etc.)
- Fungi (e.g. Mold)
- Wetlands And Other Ecological Resources
- Endangered Species
- Health and Safety
- Regulatory Compliance
- Determination of the Suitability of a Property or its Structures for any Purpose
- Emerging Contaminants
- Substances not defined as Hazardous Substances

NOTE: this list is not intended to be an all-inclusive list of all possible environmental conditions that may exist on a property that are outside the scope of ASTM E1527-21 and this report. Further, no implication is intended as to the relative importance of inquiry into such non-scope considerations.

While issues pertaining to asbestos are not within the scope of ASTM E1527-21, this report does comment on the possible presence of suspect asbestos-containing materials (ACMs), based upon 1) the age(s) of the property structure(s); and 2) physical observations during the site visit of visually accessible materials. However, a formal asbestos survey was not performed for the subject property.

Additionally, while indoor air quality is not within the scope of ASTM E1527-21, the Phase I ESA review and inspection activities have included an assessment of the likelihood of an impact to the subject property and its structures from migrating hazardous substances and petroleum products in any form, including solid and liquid at the surface or subsurface, and vapor in the subsurface, in accordance with ASTM E1527-21 and *All Appropriate Inquiries*. However, a formal Vapor Intrusion Assessment was not within the scope of this Phase I ESA and was not performed for the subject property.

2.3 Significant Assumptions

User's Responsibilities

Unless specifically noted herein, it is the obligation of the Client/User of this Phase I ESA to provide HAI with certain information as specified in ASTM E1527-21 as the *User's Responsibilities*, including:

- A Title Report that includes the required search for recorded environmental liens and activity and use limitations (AULs), as well as any actual knowledge thereof
- Information regarding any specialized knowledge or experience, or commonly known information that may be material to identifying RECs at the subject property
- Information regarding the reason for a significantly reduced property purchase price (lower than fair market value)

Inferred Groundwater Flow Direction

For the purpose of evaluating the potential for groundwater contamination from offsite sources to impact the subject property, or from onsite sources to impact surrounding areas, the uppermost groundwater flow has been inferred to generally follow surface topography, and to flow toward surface

water bodies, unless specific information is available regarding groundwater flow direction. HAI has not field-checked any of the site hydrogeological information for accuracy, nor did HAI conduct an independent evaluation of the local geology.

Accuracy/Completeness

The accuracy and completeness of “readily available” recorded information and historical documentation varies among and within information sources, including governmental sources. Historical records and documentation are often inaccurate or incomplete, or may provide conflicting information. Similarly, the accessibility to or the ease of retrieval of such records may vary or be inconsistent.

Under ASTM E1527-21, the Client/User or Environmental Professional (EP) is not obligated to identify mistakes or insufficiencies in the information provided or obtained. HAI has made a reasonable effort to take into consideration the possible significance of any such mistakes or insufficiencies that are obvious in light of the available information of which HAI has actual knowledge.

Limitations and Exceptions

This report is not intended to be an exhaustive investigation of environmental conditions, or a characterization of any contamination discovered. In performing an environmental site assessment, a balance must be struck between the desire to conduct a complete inquiry into environmental matters and the limits of time, cost and technology.

This report sets forth HAI's evaluation of the possibility of RECs based on the scope of work agreed to by the Client and within the Client's schedule and budget. HAI's limitations and exceptions are described in Section 11.0 *Limitations* and in the *Services Agreement* for this project.

Special Terms and Conditions

None.

2.4 User Reliance

Unless otherwise specified in writing, this report has been prepared solely for use by the Client and User(s), as identified in Section 2.1 *Purpose*, for use only in connection with the described property, subject to the limitations and conditions presented in Section 11.0 *Limitations* and in the *Services Agreement* for this project. Any other use by the Client/User(s) or any use

by any other person shall be at the user's sole risk, and HAI shall have neither liability nor responsibility with respect to such use.

3.0 SITE BACKGROUND

3.1 Location and Legal Description

The subject property consisted of Tax Lot 18520 located in the SW 1/4 of the NE 1/4 of Section 2, Township 13 North, Range 3 West of the Willamette Meridian (W.M.).

| Street Address | Acreage | Improvement Type |
|--|---------|------------------|
| 125 Water Street* | 0.23 | Church |
| Latitude, Longitude: 46.642569, -123.021490 | | |
| Owner: Lewis County | | |

Source: Lewis County Department of Assessment and Taxation records

* Note: the Lewis County Department of Assessment and Taxation did not provide an assigned address for the subject property. The address used in this report, 125 Water Street, was provided by the Client and is consistent with the assigned addresses of nearby properties.

3.2 Site and Vicinity General Characteristics

City/County/State: Unincorporated Lewis County near Chehalis, Washington

Distance from Town Center: Approximately 2.5 miles SW (Figure 1)

Adjacent Streets / Geographic Features:
West: Water Street

General Vicinity Characteristics: Residential usage (Figure 2).

3.3 Current Use of the Property

| | |
|--------------|---|
| Usage | Claquato Church (historical structure, not in use) (See Figure 2) |
|--------------|---|

3.4 Current Uses of the Adjoining Properties

The surrounding properties consisted of residences, as tabulated below and shown in Figure 2.

| Surrounding Properties | |
|------------------------|-------------|
| Direction | Description |
| North | Residence |
| East | Residence |
| South | Residence |
| West | Residence |

3.5 Physical Setting Sources

3.5.1 Topography

| | |
|-------------------------------------|--|
| Terrain | Relatively flat |
| Elevation (Approximate) | 250 feet above mean sea level (msl) |
| General Topographic Gradient | The vicinity of the subject property slopes gently to the southeast, toward the Chehalis River, which locally flows generally northeastward. |

Source: U.S. Geological Survey 7.5-Minute Quadrangle, Adna, Washington, 2023 (Figure 1).

3.5.2 Geology

According to the Washington Geological Survey *Geologic Map of the Adna 7.5-minute Quadrangle, Lewis County, Washington*, 2019, the subsurface soils in the vicinity of the subject property are underlain by the following Geologic Unit:

| | |
|----------------------|---|
| Geologic Unit | Mv(gN2) – Middle Miocene Grand Ronde Basalt |
| Description | Aphanitic, vesicular basaltic andesite |

3.5.3 Hydrogeology

Water wells or monitoring wells were not observed on the subject property or indicated by Washington Department of Ecology (WDOE) records to be located on the property. A WDOE well log report for all registered wells in Section 2 of Township 13 North, Range 3 West, W.M. indicated the depth to first groundwater in the vicinity of the property ranged from approximately 27 to 94 feet below ground surface (bgs). HAI did not field-check any of the site

geological or hydrogeological information for accuracy as a part of this environmental site assessment.

4.0 SITE RECONNAISSANCE

| | |
|------------------------------|---|
| Date: August 20, 2025 | Adverse Weather Conditions: None |
| Conducted By: | Ms. Eleanore Ramsey, E.P. |
| Accompanied by: | Ms. Lacie Jendryka and Mr. Ryan Barrett of Claquato Cemetery Association (the Client) |

4.1 Methodologies and Limiting Conditions

The methodologies for conducting the Site Reconnaissance of the subject property included:

- Visual inspection of the accessible interior areas of all of the structures at the property

The Church Building included a belfry that was not accessible.

- Visual inspection of the exterior areas of all of the structures at the property
- Visual inspection of the property perimeter
- Visual inspection of the remainder of the property
- Visual inspection of the adjoining properties from the subject property boundary, public rights-of-way, or other vantage points (e.g., aerial photography).

The visual inspection of the subject and adjoining properties endeavored to identify areas where hazardous substances and petroleum products may be or may have been stored, treated, handled or disposed.

4.2 General Site Observations

Interior Areas

The subject property was developed with two buildings:

| Building Designation | Year Built | Square Footage | Comments |
|---------------------------------|-------------------|-----------------------|---|
| Church (Photographs 1 and 2) | 1858 | 600 | One-story wood frame building with belfry and small crawlspace (1-2 feet high). Interior spaces included a sanctuary (Photograph 3), small narthex (vestibule), and two small rooms on either side of the narthex |
| Outhouse (Photograph 4) | Unknown | 30 | One-story wood frame building. Two rooms ("Men" and "Women"), each with one pit toilet |

The Church building had a belfry (bell tower room) located above the narthex. The belfry was not inspected during the site visit, due to the lack of a reasonable method of access. This limitation was not considered to be a significant Data Gap.

Exterior Areas

The majority of the subject property was covered with a grassy lawn and landscaped vegetation including trees, shrubs, and flower beds. A concrete pad with picnic tables was located to the south of the Church Building. Dense vegetation, including blackberries and other undergrowth, was present on the southeastern portion of the property.

The subject property was surrounded by fencing (Photographs 1 and 5). The fence line was assumed to represent the boundary of the property.

Evidence of releases of hazardous substances or petroleum products, such as stains, soil discoloration, odors, distressed vegetation, or other visible indications of impairment, was not noted within the property structures or elsewhere on the subject property.

Utilities

The subject property was served by the following utilities:

| Utility | Provider / Comments |
|-------------------|---|
| Electricity | Lewis County Public Utility District (LCPUD) |
| Water | None |
| Sewer | Outhouse (pit toilets, see Section 4.6.3 <i>Sanitary Systems</i>) |
| Heating / Cooling | Portable electric space heater (present but not currently in use). The Church was historically heated by a wood-burning stove (reportedly removed in 1953), the chimney for which was still present. An antique stove heater (not in use) was observed in a storage closet. |

Surrounding Properties

The surrounding properties were developed with residences. A shed (Photograph 6) was located on the south-adjacent property along the fence line that was assumed to be the property boundary. If a surveyor determines that this shed is actually located on the subject property, reinspection may be warranted.

Evidence of the usage, storage, or disposal of hazardous substances, petroleum products or RECs on the adjoining parcels and right-of-way areas was not observed from the property boundary or from the public right-of-way.

4.3 Storage Tanks

4.3.1 Underground Storage Tanks (USTs)

During the assessment activities, the subject property was inspected for visual evidence of underground storage tanks (USTs). Visual evidence of USTs would include fill caps, vent pipes, and pump islands.

In addition, the following resources were queried / reviewed regarding UST records pertaining to the subject property:

- Lewis County Fire District No. 6
- Washington Department of Ecology's (WDOE) Registered UST Facility and Leaking Underground Storage Tank (LUST) lists
- Mr. Ryan Barrett for Lewis County (the property Owner)

Fill caps, vent pipes, pump islands or other visual evidence of USTs was not observed at the subject property. Further, records or other evidence of the current or former presence of USTs at the property were not identified by the above-referenced resources.

4.3.2 Aboveground Storage Tanks (ASTs)

The subject property was visually inspected for evidence of aboveground storage tanks (ASTs). Visual evidence of ASTs would include tanks, concrete foundations or saddles, pedestals or steel support structures.

Tanks, concrete foundations, saddles, pedestals, steel support structures, or other evidence of ASTs was not observed on the subject property.

4.4 Polychlorinated Biphenyls (PCBs)

Polychlorinated biphenyls (PCBs), EPA-regulated hazardous substances, are commonly found in electrical equipment manufactured prior to 1980, the year PCBs above 50 parts per million (ppm) were banned from commerce for most applications. Pole and pad-mounted fluid-filled electrical transformers, ballasts associated with fluorescent light fixtures and some hydraulic fluids are typical of electrical equipment that would be suspected to contain PCBs.

Typical electrical equipment that would be suspected to contain PCBs include the following:

- Pole and pad-mounted fluid-filled electrical transformers
- Ballasts associated with fluorescent light fixtures
- Hydraulic fluids
- Submersible water well pumps manufactured prior to 1979

| Equipment Type | Number / Location | PCBs Likely? |
|--------------------------------------|---|--------------|
| Fluid-Filled Electrical Transformers | One pad-mounted unit, onsite One pole-mounted unit, adjacent | Possible |
| Hydraulic Fluids | Hydraulic Equipment: None | NA |
| Fluorescent Light Ballasts | None observed | NA |
| Onsite Well(s) | None observed or indicated | NA |

Electrical Transformers

One pad-mounted, fluid-filled electrical transformer was located on the subject property (Photograph 5), and one pole-mounted, fluid-filled electrical transformer was located immediately adjacent to the property's northwestern perimeter (Figure 2). The units were not labeled for PCB content, and should be assumed to contain PCBs. Lewis County Public Utility District, the utility that owns the transformers, is responsible for the cleanup of the release of any transformer fluids. The transformers noted during the site visit did not appear to have leaked.

4.5 Hazardous Substances, Petroleum Products, and Hazardous Wastes

The subject property was visually inspected for signs of the storage, use or disposal of hazardous substances, petroleum products, and hazardous wastes (e.g. containers, drums, staining, leakage, etc.).

A bag of granular lime (calcium hydroxide) was observed in a small room in the Church building. The lime was likely used for maintenance (odor control) of the Outhouse pit toilets.

Evidence of the usage, storage, or disposal of hazardous substances, petroleum products, and/or hazardous wastes, including 55-gallon drums, was not observed on the subject property.

4.6 Wastewater and Stormwater

4.6.1 Wastewater Discharge Sources

Evidence of industrial, process or other discharge sources was not observed at the subject property.

4.6.2 Subsurface Discharge Features

The subject property was inspected for evidence of subsurface discharge features (e.g. floor drains, oil/water separators, sumps, and trenches).

Evidence of subsurface discharge features was not observed at the subject property.

4.6.3 Sanitary Systems

The subject property was visually inspected for evidence of current or former onsite sanitary systems (e.g. septic tanks, cesspools).

The subject property was served by an onsite outhouse (Photograph 4) equipped with two pit toilets, each in its own room with separate doors (“men” and “women”). Each toilet appeared to be situated directly over a cylindrical concrete-walled pit, approximately 5 feet deep. Fluid was observed to be present in the base of each pit. Strong odors were not noted.

Requests were made to representatives of Lewis County for records pertaining to the subject property pit toilets and also for information regarding applicable local regulations. A response to these requests was not received within the timeframe for this report. If additional relevant information is received subsequent to the finalization of this report, HAI will provide it to the Client.

4.6.4 Stormwater Discharge

Stormwater

Stormwater features, such as catch basins or bioswales, were not observed at the subject property. Accordingly, stormwater at the property would infiltrate into the ground surface and/or flow as sheet runoff downslope to the southeast.

Drywells

Drywells were not observed or indicated by permits or plans to be present at the subject property.

Surface Water

Evidence of surface water (e.g. ponds, lagoons or standing surface water indicative of industrial or wastewater disposal) was not observed at the subject property. Surface water in this context does not include naturally occurring bodies of water such as rivers, lakes, streams, or wetlands (annual or perennial).

4.7 Solid Waste Disposal / Fill Materials

4.7.1 Solid Waste Disposal

Solid waste generated at the subject property was disposed of by the municipal solid waste service. Uncontrolled or improper solid waste disposal practices were not observed at the property.

4.7.2 Fill Materials

The presence of undocumented fill at a property could present environmental concerns. Although the possibility exists that undocumented fill could be located on the subject property, evidence of imported fill was not observed on the property (e.g. stockpiles, mounds, hummocks, depressions, etc.) or identified by interviews or the historical records review performed for the property.

4.8 Wells

The subject property was inspected for evidence of wells (e.g. potable supply, irrigation, monitoring, extraction, dry injection).

Based on the long history of the property, including a residence (1850s-1880s) and school use (1850s-1870s), it is possible that a well was historically present. The property is not currently provided with running water, and has not been since at least the 1950s.

Evidence of wells was not observed at the subject property during the Site Reconnaissance. Further, wells were not indicated by WDOE records, interviews or the historical records review to be located on the property.

If an out-of-use well is encountered during future site redevelopment activities, it should be properly abandoned in accordance with applicable regulations.

4.9 Additional Services

Unless specifically noted herein, the Phase I ESA review and inspection activities did not include items that are outside the scope of ASTM E1527-21 such as issues related to lead-based paint, lead in drinking water, electromagnetic radiation, cultural and/or historical resources, indoor air quality (e.g. vapor intrusion, radon, etc.), fungi (e.g. mold), wetlands and other ecological resources, and endangered species. Similarly, the review

and inspection activities did not include surveys for asbestos, health and safety, regulatory compliance, or a determination of the suitability of a property or its structures for any purpose.

An asbestos survey was not within the scope of this Phase I ESA and was not performed for the subject property. However, HAI conducted a limited visual assessment for suspect asbestos-containing materials (ACMs) at the time of the site visit. This visual assessment did not constitute an asbestos survey and was not intended to identify every suspect ACM at the property.

4.9.1 Asbestos

Asbestos is a U. S. Environmental Protection Agency (EPA)-regulated toxic substance and a human carcinogen. By EPA standards, asbestos-containing material (ACM) is any material that contain more than one percent asbestos. ACMs were typically used in insulation materials, ceiling tiles, and linoleum manufactured prior to the mid-1970s. However, certain types of ACMs, including roofing felt and coatings, among others, may continue to legally be imported or produced, sold, and installed in structures today.

EPA requires that all Regulated ACM (RACM) be removed from a site prior to demolition, dismantling or renovation of structures to prevent the release of asbestos fibers to the air. RACM would include friable ACM or nonfriable ACM that will be or has been subjected to sanding, grinding, cutting or abrading, or has crumbled, or has been pulverized or reduced to powder in the course of demolition or renovation operations. Friable ACM is defined as any material with more than one percent asbestos by weight that hand pressure can crumble, pulverize or reduce to powder when dry.

State regulations further require that all ACMs be removed from a site prior to demolition, dismantling or renovation of structures, regardless if the material is friable.

In addition, federal and state Occupational Safety and Health Administrations (OSHA) require that commercial and industrial building and facility owners communicate asbestos hazards and provide asbestos awareness training to tenants, employees, and maintenance personnel.

Suspect ACMs were noted at the subject property, including wallpaper (Photograph 3) and window putty, located throughout much of the building. Based upon the age of the building (built in 1858, with a major remodel including the addition of wallpaper and reglazing of windows in 1953),

additional materials may be present that contain asbestos. The condition of these materials was noted to be fair to good.

4.9.2 Potential for Low-Level Soil Contamination

A Clean Fill Determination was not within the scope of this Phase I ESA and was not performed for the subject property. A Clean Fill Determination would include soil sampling and quantitative analysis, none of which was performed during this Phase I ESA.

At many sites, notably those located in industrial, agricultural, and/or urban areas, previous environmental sampling and analysis has detected low levels of hazardous substances impacts in site soils. The source of these low-level hazardous substances impacts varies but is generally related to the fact that the original soils have been altered by site construction and/or demolition activities, by the addition of fill materials, by the storage, usage and disposal of hazardous materials at industrial sites, by the historical usage of pesticides at agricultural sites, and/or by air and water deposition of contaminants ubiquitous in urban environments.

Typically, such low-level hazardous substances impacts in soils do not present an environmental or human health-related concern, and if left in-place, undisturbed, no actions would be necessary for these soils. However, if they are to be excavated and removed as part of future site construction activities, then such soils may not qualify for unrestricted management and reuse or disposal.

Based upon the location of the subject property outside of an urban area, and its development and usage history (church), the likelihood of low-level hazardous substances impacts in soils at the subject property that could disqualify them as Clean Fill is anticipated to be low.

5.0 INTERVIEWS

5.1 Interviews with Owner, Site Manager, Occupant

Attempts were made to interview current Owner(s), the key site manager, occupants and/or major occupants, and occupants likely to use, store, treat, handle, or dispose of hazardous substances or petroleum products at the subject property. In addition, to the extent that they have been identified, past owners, operators, and occupants likely to have information regarding the potential for contamination at the property were also interviewed.

Further, a reasonable attempt has been made to interview a state and/or local government agency. Additional personnel may also be interviewed as deemed necessary. Data Gaps regarding the referenced interviews are discussed below and in Section 11.1 *Data Gaps*.

Current Property Owner, Key Site Manager, and Occupant

Information obtained from Lewis County Tax records and title records provided by the Client identified the following current Owner of the subject property:

| Owner | Year Acquired |
|--------------|----------------------|
| Lewis County | 1948 |

Mr. Ryan Barrett, County Manager for Lewis County, the subject property Owner, was interviewed on September 2, 2025. Mr. Barrett indicated the following:

- Lewis County acquired the property in the 1940s. It was historically used as a church. Since its acquisition by the County, it has been used occasionally to host small events.
- He has been familiar with the property in his professional capacity for Lewis County since approximately 2023.
- Mr. Barrett did not have information pertaining to the outhouse / pit toilets located on the subject property. He suggested contacting Mindy Brooks, a representative of the Lewis County Department of Community Development.

Mr. Barrett indicated that he was not aware of:

- Other historical uses of the property or of any former property structures
- Any existing or former USTs, ASTs, water supply wells, septic tanks, drywells, pits, sumps, fill material, or hazardous substances and/or petroleum product usage on the property
- Environmental permits, notices, significantly lower property purchase price (lower than comparable), environmental liens or activity and use limitations, or RECs in association with the property
- Any pending, threatened or past litigation or administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property
- Any notices from any government entity regarding possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products

- Environmental conditions that have affected or may affect the purchase or lease price of the property.
- Any specialized knowledge of the property or surrounding sites, and knew of no commonly known information about the property that would help in identifying conditions indicative of releases or threatened releases, including RECs at the property
- Any obvious indicators that point to the presence or likely presence of contamination at the property.

5.2 Interviews with Past Owners, Operators, Occupants

Past Property Owner(s), Operator(s) and Occupant(s)

Information obtained from title records provided by the Client identified the following former Owner of the subject property:

| Owner | Years Owned |
|--------------------|---------------|
| Diocese of Olympia | Prior to 1948 |

Based upon the duration of ownership by the current Owner, combined with the information obtained from historical aerial photographs and other historical resources, all of which indicated that the property has been developed with the current church building since 1858, HAI determined that interviews with previous Owners would not provide additional information.

5.3 Interviews with Government Officials / Others

State and/or Local Government Agency

State and County government agency records and information were readily available through Internet database searches and queries. Local agency representatives for the building and fire departments did not have additional information beyond publicly available records and plans (Section 7.1 *Historical Use Resources*). Accordingly, interviews with state or local government agency representatives were not conducted during this assessment.

6.0 USER-PROVIDED INFORMATION

Persons (e.g. the Client/User) seeking to qualify for the innocent landowner defense, prospective purchaser or contiguous property owner liability protection under CERCLA must provide any specialized knowledge of the subject property or surrounding sites, commonly known or reasonably ascertainable information within the community regarding the subject property, and any other experience relevant to this inquiry, for the purpose of identifying conditions indicative of releases or threatened releases at the subject property. The Client/User must also consider the degree of obviousness of the presence or likely presence of contamination on the property.

Mr. Brett Mitchell of the Claquato Cemetery Association (the Client/User) completed a *Phase I Environmental Site Assessment User Questionnaire* (Appendix B).

6.1 Title Records

On behalf of the Claquato Cemetery Association (the Client/User), Mr. Mitchell provided HAI with an *Amended Commitment for Title Insurance* for the subject property, prepared by First American Title Insurance Company and dated July 11, 2025 (Appendix C).

6.2 Environmental Liens or Activity and Use Limitations

Mr. Mitchell indicated that he was not aware of federal, tribal, state, or local environmental liens or activity and use limitations (AULs, such as engineering or institutional controls) in association with the subject property, as borne out by the *Amended Commitment for Title Insurance* provided by the Claquato Cemetery Association.

6.3 Specialized Knowledge and Commonly Known or Reasonably Ascertainable Information

Mr. Mitchell indicated that he had no specialized knowledge of the property or surrounding sites, and that he knew of no commonly known information about the property that would help in identifying conditions indicative of releases or threatened releases, including RECs at the property.

Mr. Mitchell stated that the subject property has been used as a church.

In addition to the *Amended Commitment for Title Insurance*, the Client also provided the following documents:

- Ron Wright & Associates/Architects, PS. *Claquato Church, Historic Structure Report*. June 2024.
- Title Guaranty Company of Lewis County. *Copies of Documents*. Undated / dates of documents vary.

6.4 Valuation Reduction for Environmental Issues

Mr. Mitchell indicated that he was not aware of:

- Environmental permits, notices, or significantly lower property purchase price (lower than fair market value)
- Any pending, threatened, or past litigation or administrative proceedings concerning hazardous substances or petroleum products in relation to the property
- Any notices from any government entity regarding possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products
- Environmental conditions that have affected or may affect the purchase or lease price of the property
- Knowledge of RECs at the property or of any obvious indicators that point to the presence or likely presence of contamination at the property.

6.5 Reason for Performing Phase I ESA

Mr. Mitchell indicated that the Claquato Cemetery Association was conducting the Phase I ESA for due diligence purposes in support of Landowner Liability Protections under CERCLA prior to the acquisition of the property.

7.0 SITE HISTORY

7.1 Historical Use Resources

A combination of practically reviewable information (available within reasonable cost and time constraints) was obtained from publicly available records and resources. While such information is typically incomplete, the following resources were reviewed to establish the documented history of the subject property and surrounding land use:

| Resource Type | Years Reviewed or Search Term | Source |
|-------------------------------|---|--|
| Building Plans/Permits | Subject property address and/or tax ID | Lewis County |
| Historical Topographic Maps | 1941, 1953, 1986, 1993 | U.S. Geological Survey TopoView website |
| Historical Aerial Photographs | 1951, 1952, 1968, 1975, 1980, 1982 | U.S. Geological Survey Earth Explorer website |
| | 1990, 2006, 2009, 2012, 2018, 2024 | Google Earth Imagery |
| Local Historical Society | Claquato Church | Lewis County Historical Society and Museum, photographs and other resources available online (https://lewiscountymuseum.org/) |
| Historic Structure Report | Provided by Client. Prepared in 2024 by Ron Wright & Associates/Architects, PS (2024 HSR) | |
| Reverse City Directories | 1980, 1984, 1988, 1992, 1995, 2000, 2005, 2010, 2014, 2017, 2022 | EDR City Directory Image Report (Appendix D) |
| Sanborn Fire Insurance Maps | No Coverage | EDR Certified Sanborn Map Report |
| Tax Assessment Records | Subject property address and/or tax ID | Lewis County |

In addition to the above-referenced resources, several informative signs were observed during the site visit that provided historical information about the subject property and surrounding properties. A complete listing of all references, including sources and dates of review, is included in Section 14.0 *References*. Aerial photographs for the years 1951, 1982, 2009, and 2024 are included in the Appendix of this report.

7.2 Previous Environmental Site Assessments

Previous ESAs for the subject property were not provided to HAI for review. Mr. Brett Mitchell of the Claquato Cemetery Association (the Client/User) and Mr. Ryan Barrett of Lewis County (the property Owner) were not aware of previous ESAs having been performed for the property.

7.3 Summary of Historical Use

Based upon the interviews and the resources that were reviewed, the history of the subject property and of the surrounding land use was determined.

Current and Former Addresses: The Lewis County Department of Assessment and Taxation did not provide an assigned address for the subject property. The address used for historical and regulatory research for the property, 125 Water Street, was provided by the Client and is consistent with the assigned addresses of nearby properties.

Subject Property

1858 – 1880s: Existing Church Building and Former Parsonage

According to historical information, the existing Church Building was constructed in 1956. It was used as a church from 1858 through the 1930s and also as a school (Claquato Academy) from 1858 to 1873.

According to an interpretive sign posted at the subject property, the 1859 plat map of Claquato showed a parsonage (a residence occupied by the pastor of the church) on the property, immediately to the north of the Church Building. An historical photograph identified as having been taken in the 1880s showed the parsonage (2024 HSR). Historical photographs dated 1891 and later did not show the parsonage.

1890s – Present: Existing Church Building (no parsonage)

The use of the Church Building for regular church services ended in the 1930s. The building was largely unused during the 1930s.

Lewis County acquired ownership of the subject property in 1948.

Significant repairs to the Church Building occurred in 1953, including the removal of the original wood stove, which had been located in the middle of the sanctuary directly below the existing chimney. Other repairs included replacement of roof, steps, and louvers, foundation repair, reglazing of windows and transom, repainting of interior and exterior, and general interior restoration, including hanging of wallpaper. The Church Building was rededicated as a “Pioneer Memorial”. It has been maintained by Lewis County as an historical site and it has been available for use for small events.

An electrical permit dated 1991 was posted inside the Church Building and was observed during the site visit. The Owner was noted to be the Lewis

County Parks Department, and the address was listed as 125 Water Street. The work was described as “rewiring Claquato Church Building from transformer to building”.

Unknown – Present: Existing Church Building and Outhouse

An outhouse structure was noted during the site visit. The age of the outhouse could not be determined, although it appeared to be a newer structure than the Church Building.

Surrounding Properties

A roadway has been present to the west of the subject property from at least the 1850s through the present. It has had several names, including Military Road or Military Street (1850s-1900s), Park to Market Road (1930s), Centerville to Claquato (1940s-1950s), and Water Street (1960s-present).

The 1859 plat map (posted on a sign at the subject property) showed that the surrounding properties were used for residential and commercial purposes, including a general store, hotel, carpenter shop, blacksmith shop, and a livery stable. After being bypassed by the railroad, the population of Claquato declined, and the town’s plat was vacated in 1902.

Historical resources indicated that the surrounding properties were undeveloped or used for residential purposes from at least 1941 through the present. Orchard trees were present on the north-adjacent property in the 1950s and 1980s.

8.0 RECORDS REVIEW

As a part of this Phase I ESA of the subject property and as deemed necessary, inquiries were made to governmental agencies with jurisdiction over current and prior activities conducted at the subject property that could have affected the environment. When available and as necessary, files on nearby properties were also reviewed and agency personnel knowledgeable about activities conducted in the area of the subject property were interviewed.

Environmental Data Resources (EDR) was contracted by HAI to provide a regulatory site radius search which has been analyzed and interpreted by HAI. The EDR *Radius Map™ Report*, dated August 14, 2025, is included in Appendix E.

The following lists satisfy the requirements of ASTM E1527-21 for the review of records. As indicated by EDR, the lists reviewed for the *Radius Map™ Report* are obtained on a quarterly basis from the source agencies and represent the most recent data available at the time of the quarterly update. When available and as necessary, information furnished by EDR was cross-referenced by HAI to readily available online database lists. The lists cross-referenced by HAI were the most recent lists available online as of September 1, 2025.

STANDARD ENVIRONMENTAL RECORD SOURCES

| WDOE Underground Injection Control (UIC) Database | Subject Property | 0 |

Subject Property

The subject property did not appear on any of the environmental records sources reviewed for this Phase I ESA.

Surrounding Sites

The review of environmental records sources disclosed a number of sites located within an approximately 1.0-mile radius of the subject property. However, none of the identified sites appear to represent a REC for the property based upon their distance from the property (greater than 800 feet), combined with their downgradient or cross-gradient position relative to the property, and/or the fact that groundwater was not reported to have been impacted.

9.0 FINDINGS AND OPINIONS

This Phase I ESA did not reveal evidence of RECs, including CRECs, or Historical RECs (HRECs) in connection with the subject property.

Further, the Site Reconnaissance also did not identify the current or former presence of:

- Underground or aboveground storage tanks
- 55-gallon drums
- Significant quantities of hazardous substances, petroleum products or hazardous waste
- Significant Data Gaps

However, while not Recognized Environmental Conditions under E1527-21, the following information is presented:

- Based upon the age of the Church Building (built in 1858, with major restoration work conducted in 1953), materials used in its construction may contain asbestos. The age of the Outhouse building could not be determined, and it may also contain asbestos. **Recommendation:** It is recommended that an asbestos survey be performed prior to any construction or demolition activities. Areas found to contain asbestos which are in a deteriorated condition should undergo abatement or be repaired by a licensed asbestos contractor.
- The subject property was served by a pair of on-site pit toilets. **Recommendation:** If usage of the pit toilets is to be discontinued, it should be abandoned according to the applicable regulations.

10.0 CONCLUSIONS

Hahn and Associates, Inc. has performed this Phase I ESA in conformance with the scope and limitations of the ASTM Practice E1527-21 of the Claquato Church property located in the vicinity of 125 Water Street, Chehalis, Lewis County, Washington. Any exceptions to, or deletions from, this practice are described in Section 11.0 of this report.

This Phase I Environmental Site Assessment did not reveal evidence of Recognized Environmental Conditions, Controlled Recognized Environmental Conditions, or Significant Data Gaps in connection with the subject property as detailed in Section 9 Findings and Opinions. From the data that was assembled during the course of this investigation, it is the professional opinion of Hahn and Associates, Inc. that further investigatory work in the form of a Phase II Environmental Site Assessment does not appear to be necessary for the subject property.

11.0 DEVIATIONS

This Phase I ESA deviates from ASTM E1527-21 as follows:

- See Data Gaps below

11.1 Data Gaps

A Data Gap is defined in ASTM E1527-21 as a lack of or inability to obtain information required by the standards and practices listed in the regulation despite good faith efforts by the environmental professional or prospective landowner to gather such information. Such Data Gaps may affect the environmental professional's ability to identify RECs at the property.

A Data Failure is defined as the failure to achieve the historical research objectives contained in ASTM E1527-21, including identifying obvious uses of the property from the present, back to the property's first developed use, or back to 1940, whichever is earlier. A Data Failure is one type of Data Gap.

The following Data Gap was identified in association with this Phase I ESA, along with its significance and the attempts made to fill the Data Gap:

- The Church building had a belfry (bell tower room) located above the narthex. The belfry was not inspected during the site visit, due to the

lack of a reasonable method of access. This limitation was not considered to be a significant Data Gap.

12.0 ADDITIONAL SERVICES

In addition to the basic elements of ASTM E1527-21, this report includes the following:

- A visual assessment for suspect asbestos-containing materials was conducted during the course of the Site Reconnaissance (Section 4.9.1). This visual assessment did not constitute an asbestos survey and was not intended to identify every suspect asbestos-containing material at the subject property.
- A general statement regarding site conditions that may disqualify the soils at the subject property for unrestricted management and reuse or disposal in the future (Section 4.9.2). This general statement of site conditions does not constitute the characterization of the environmental condition of site soils and is not intended to indicate the actual presence or absence of hazardous substances impacts to soils at the subject property.

13.0 LIMITATIONS

The purpose of this environmental assessment is to evaluate the possibility that the specified real property contains a *Recognized Environmental Condition* (REC), as defined by the American Society for Testing and Materials (ASTM) guideline (E1527-21). In performing an environmental assessment, a balance must be struck between the desire to conduct a complete inquiry into environmental matters and the limits of time, cost and technology. This report sets forth HAI's evaluation of the possibility of RECs based on the scope of work agreed to by the Client and within the Client's schedule and budget.

No investigation is thorough enough to ensure that hazardous substances are not present on a particular property. Even if RECs have not been identified in this report, there is no guarantee that contamination or other environmental conditions are not present. If samples have been collected in connection with this assessment, our assessment is based in part on our interpretation of data from discrete sample locations that may not represent actual conditions at unsampled locations. In evaluating the potential risks associated with the subject property, we have focused on possible sources on the property and on property in the immediate vicinity. We have not attempted to assess the risk that the property may be affected by regional contamination problems, such as the possibility of widespread contamination of the groundwater from sources not associated with this property.

All conclusions, opinions, and recommendations presented in this report are based on conditions existing at the time the services were performed and the laws, practices and technology in effect and commonly used as of that time. HAI is not able to predict future events that may affect the condition of the property or that may affect the risks attendant to such conditions.

Unless otherwise specified in this report, HAI has not investigated either the conditions inside any buildings on the property or the possible presence of hazardous substances incorporated into buildings, equipment, or other improvements on the property. HAI has not investigated conditions in any area of the property not readily accessible. Except as specifically described in this report, HAI also has not investigated the presence of hazardous substances that may be naturally occurring on the property. HAI has relied on information provided by the Client and other individuals and documents and has not verified the accuracy of such information.

Unless otherwise specified in writing, this report has been prepared solely for the use by the Client and Users, as identified in this report, and for use only in connection with the described property, subject to the limitations and conditions in HAI's services agreement with its Client. Any other use by the Client/Users or any use by any other person shall be at the user's sole risk, and HAI shall have neither liability nor responsibility with respect to such use.

16.0 DESCRIPTION OF ENVIRONMENTAL DATABASES

Federal NPL Sites List: The EPA National Priority List (NPL) details the locations of hazardous substance sites that present a potential for imminent and substantial harm to the environment.

Federal De-listed NPL Sites List: The Federal De-listed NPL Site (NPL) List details the locations of hazardous substance sites where either environmentally significant quantities of hazardous waste were never confirmed at the site, or an environmentally insignificant amount of hazardous waste is all that remains at the site as a result of remediation.

Federal CERCLIS List: The Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) lists hazardous substance sites that require preliminary investigation or are undergoing EPA investigations.

Federal CERCLIS NFRAP List: This report lists all CERCLIS No Further Remedial Action Planned (NFRAP) sites, which are CERCLIS sites that have been removed from the CERCLIS List. Archived status indicates that contamination was not found at the CERCLIS NFRAP sites, the contamination has been remediated, or the contamination has been deemed to not be significant enough to require consideration under CERCLIS or NPL. The listing of a site on the CERCLIS NFRAP does not necessarily imply that contamination has been deemed insignificant or remediated based upon applicable state or local standards.

Federal Superfund Enterprise Management System: The Federal Superfund Enterprise Management System (SEMS) was developed to replace the Federal CERCLIS Public Access Database, and was made operational in 2016. SEMS includes the same data fields and content as CERCLIS. The Federal CERCLIS Public Access Database, which contained a selected set of publicly releasable Superfund program data, was retired in 2013.

Federal CORRACTS List: The Corrective Action Report (CORRACTS) List identifies hazardous waste handlers with RCRA corrective action activity.

Federal RCRA TSD Facilities List: The EPA Resource Conservation and Recovery Act (RCRA) Treatment, Storage and Disposal (TSD) Facilities List identifies sites which manage hazardous waste for the purpose of on-site treatment, interim storage, or on-site disposal.

Federal RCRA Handlers List: The EPA RCRA Handlers List identifies facilities which have given notification as current hazardous waste generators, including Large Quantity Generators (LQG), Small Quantity Generators (SQG), or Conditionally Exempt Generators (CEGs), and facilities that do not presently generate hazardous waste (Non-Generators).

Federal Engineering and Institutional Controls Lists: The EPA Federal Engineering Controls List identifies sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or affect human health. The EPA Federal Institutional Controls List identifies sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements

intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Federal ERNS List: The Emergency Response Notification System (ERNS) List records and stores information on reported releases of oil and hazardous substances.

Indian LUST List: The Indian LUST List identified leaking USTs on Indian land in Alaska, Idaho, Oregon and Washington.

Indian UST List: The Indian UST List identified USTs on Indian land in Alaska, Idaho, Oregon and Washington.

Federal Brownfields Program Sites List: EPA's Brownfields Program empowers states, communities, and other stakeholders in economic development to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A Brownfield Site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant.

WDOE CSCS List: WDOE Confirmed and Suspected Contaminated Sites (CSCS) List identifies hazardous substance sites undergoing WDOE investigations, and includes facilities also listed on the WDOE Voluntary Cleanup Program (VCP) and Independent Cleanup Program (ICP).

WDOE CSCS-NFA Lists: The WDOE CSCS-NFA List those sites previously on the Confirmed and Suspected Contaminated Sites List that have received a No Further Action (NFA) determination

WDOE SWF/LF List: In Washington State, most of the Solid Waste Facilities (SWF) and Landfills (LF) are permitted by the local Jurisdictional Health Departments. The types of permitted facilities include anaerobic digesters, limited purpose landfills, inert waste landfills, transfer stations and drop boxes, compost facilities, land application sites, pile storage and treatment, surface impoundments, tanks, waste tire storage facilities, moderate risk waste facilities, recycling and material recovery facilities, energy recovery facilities and incinerators.

WDOE LUST List: The WDOE Leaking Underground Storage Tank (LUST) Database List contains an inventory of reported LUST incidents in Washington.

WDOE UST Lists: The WDOE UST Lists identify regulated Underground Storage Tanks at Active and Inactive facilities in Washington state. Active facilities are defined as those having at least one tank with Operational, Temporarily Closed, Deferred or Red Tag status. Inactive facilities are defined as those that have no tanks with Operational, Temporarily Closed, Deferred or Red Tag status

WDOE Spills List: The WDOE Spills list identifies spills reported to the Spill Prevention, Preparedness, and Response Division.

US Clandestine Drug Lab (CDL) Sites List: The United States Department of Justice provides a website containing addresses of some locations where law agencies have reported evidence suggesting that illegal drug manufacturing (primarily methamphetamine) or where dumping and/or storage activities have taken place. The Department of Justice does not verify the source or accuracy of the reports.

17.0 DEFINITIONS OF TERMS

Abandoned Property — property that can be presumed to be deserted, or an intent to relinquish possession or control can be inferred from the general disrepair or lack of activity thereon such that a reasonable person could believe that there was an intent on the part of the current owner to surrender rights to the property.

Activity and Use Limitation (AUL) — legal or physical restrictions or limitations on the use of, or access to, a site or facility: (1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil, soil vapor, groundwater, and/or surface water on the property, or (2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls, are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil or groundwater on the property.

Actual Knowledge — the knowledge actually possessed by an individual who is a real person, rather than an entity. Actual knowledge is to be distinguished from constructive knowledge, that is knowledge imputed to an individual or entity.

Adjoining Properties — any real property or properties the border of which is contiguous or partially contiguous with that of the property, or that would be contiguous or partially contiguous with that of the property but for a street, road, or other public thoroughfare separating them.

Aerial Photographs — photographs taken from an aerial platform with sufficient resolution to allow identification of development and activities of areas encompassing the property.

All Appropriate Inquiries — that inquiry constituting “all appropriate inquiries into the previous ownership and uses of the property consistent with good commercial or customary practice” as defined in CERCLA, 42 U.S.C §9601(35)(B), that will qualify a party to a commercial real estate transaction for one of threshold criteria for satisfying the landowner liability protections to CERCLA liability (42 U.S.C §9601(35)(A) & (B), §9607(b)(3), §9607(q); and §9607(r)), assuming compliance with other elements of the defense.

Approximate Minimum Search Distance — the area for which records must be obtained and reviewed under ASTM E1527-21, subject to limitations as provided in ASTM E1527-21. This distance is to be measured from the nearest subject property boundary. This term is used in lieu of radius to include irregularly shaped properties.

Bona Fide Prospective Purchaser [42 U.S.C. § 9607(r)] — a person may qualify as a *bona fide prospective purchaser* if, among other requirements, such person made “*all appropriate inquiries* into the previous ownership and uses of the facility in accordance with generally accepted good commercial and customary standards and practices.” Knowledge of contamination resulting from *all appropriate inquiries* would not generally preclude this liability protection. A person must make *all appropriate inquiries* on or before the date of purchase. The facility must have been purchased after January 11, 2002

Business Environmental Risk (BER)— a risk which can have a material environmental or environmentally-driven impact on a business associated with the current or future use of commercial real estate. Consideration of BER issues may involve addressing one or more non-scope considerations and is not necessarily limited to those environmental issues required to be investigated under ASTM E1527-21, and may involve addressing considerations outside the scope of this practice (non-scope considerations).

Continuing Obligations — Continuing Obligations that the Client/User must achieve and maintain in order to qualify for one of the Landowner Liability Protections (LLPs) to CERCLA liability under the 2002 Brownfields Amendments, assuming compliance with other elements of the defense. Continuing Obligations include: (1) complying with land use restrictions and institutional controls; (2) taking reasonable steps with respect to hazardous substance releases; (3) providing full cooperation, assistance, and access to persons that are authorized to conduct response actions or natural resource restoration; (4) complying with requests for information and with administrative subpoenas; and (5) providing legally required notices.

Controlled Recognized Environmental Condition (CREC) — a REC affecting the *subject property* that has been addressed to the satisfaction of the applicable regulatory authority or authorities *with hazardous substances or petroleum products* allowed to remain in place subject to the implementation of required controls (e.g., AULs or other property use limitations).

Data Failure — failure to achieve the historical research objectives contained in ASTM E1527-21 (includes identifying obvious uses of the property from the present, back to the property's first developed use, or back to 1940, whichever is earlier), even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. Data Failure is one type of Data Gap.

Data Gap — a lack of or inability to obtain information required by this practice despite good faith efforts by the *environmental professional* to gather such information. *Data gaps* may result from incompleteness in any of the activities required by this practice, including, but not limited to *Site Reconnaissance* (for example, an inability to conduct the *site visit*), and interviews (for example, an inability to interview the *key site manager*, regulatory officials, etc.).

De Minimis Condition — a condition that generally does not present a material risk of harm to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not recognized environmental conditions or controlled recognized environmental conditions.

Drywells — underground areas where soil has been removed and replaced with pea gravel, coarse sand, or large rocks. Dry wells are used for drainage, to control storm runoff, for the collection of spilled liquids (intentional and non-intentional) and wastewater disposal (often illegal).

Environment — The term “environment” includes (A) the navigable waters, the waters of the contiguous zone, and the ocean waters of which the natural resources are under the exclusive management authority of the United States under the Magnuson-Stevens Fishery Conservation and Management Act: and (B) any other surface water, groundwater, drinking water supply, land surface or subsurface strata, or ambient air within the United States or under the jurisdiction of the United States, as defined in CERCLA 42 U.S.C. § 9601(8)).

Environmental Compliance Audit — the investigative process to determine if the operations of an existing facility are in compliance with applicable environmental laws and regulations. This term should not be used to describe this practice, although an environmental compliance audit may include an environmental site assessment or, if prior audits are available, may be part of an environmental site assessment.

Environmental Lien — a charge, security, or encumbrance upon title to a property to secure the payment of a cost, damage, debt, obligation, or duty arising out of response actions, cleanup, or other remediation of hazardous substances or petroleum products upon a property, including (but not limited to) liens imposed pursuant to CERCLA 42 U.S.C. §9607(1) & 9607(r) and similar state or local laws.

Environmental Professional — (1) a person who possesses sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases on, at, in, or to a property, sufficient to meet the objectives and performance factors in §312.20(e) and (f).

(2) Such a person must: (i) hold a current Professional Engineer’s or Professional Geologist’s license or registration from a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) and have the equivalent of three (3) years of full-time relevant experience; or (ii) be licensed or certified by the federal government, a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) to perform environmental inquiries as defined in §312.21 and have the equivalent of three (3) years of full-time relevant experience; or (iii) have a Baccalaureate or higher degree from an accredited institution of higher education in a discipline of engineering or science and the equivalent of five (5) years of full-time relevant experience; or (iv) have the equivalent of ten (10) years of full-time relevant experience.

(3) An environmental professional should remain current in his or her field through participation in continuing education or other activities.

(4) The definition of environmental professional provided above does not preempt state professional licensing or registration requirements such as those for a professional geologist, engineer, or site remediation professional. Before commencing work, a person should determine the applicability of state professional licensing or registration laws to the activities to be undertaken as part of the inquiry identified in §312.21(b).

(5) A person who does not qualify as an environmental professional under the foregoing definition may assist in the conduct of all appropriate inquiries in accordance with this part if such person is under the supervision or responsible charge of a person meeting the definition of an environmental professional provided above when conducting such activities.

Environmental Site Assessment (ESA) — the process by which a person or entity seeks to determine if a particular parcel of real property (including improvements) is subject to *recognized environmental conditions*. At the option of the user, an environmental site assessment may include more inquiry than that constituting all appropriate inquiries or, if the user is not concerned about qualifying for the *landowner liability protections* (LLPs), less inquiry than that constituting all appropriate inquiries. An environmental site assessment is both different from and often less rigorous than an environmental compliance audit.

Fill Dirt — dirt, soil, sand, or other earth, that is obtained off-site, that is used to fill holes or depressions, create mounds, or otherwise artificially change the grade or elevation of real property. It does not include material that is used in limited quantities for normal landscaping activities.

Good Faith — the absence of any intention to seek an unfair advantage or to defraud another party; an honest and sincere intention to fulfill one's obligations in the conduct or transaction concerned.

Hazardous Substance — Per ASTM 1527-21, a substance defined as a *hazardous substance* pursuant to CERCLA 42 U.S.C. §9601(14), as interpreted by EPA regulations and the courts: “(A) any substance designated pursuant to section 1321(b)(2)(A) of Title 33, (B) any element, compound, mixture, solution, or substance designated pursuant to section 9602 of this title, (C) any *hazardous waste* having the characteristics identified under or listed pursuant to section 3001 of the Resource Conservation and Recovery Act of 1976 (RCRA), as amended, (42 U.S.C. §6921) (but not including any waste the regulation of which under RCRA (42 U.S.C. §6901 et seq.) has been suspended by Act of Congress), (D) any toxic pollutant listed under section 1317(a) of Title 33, (E) any hazardous air pollutant listed under section 112 of the Clean Air Act (42 U.S.C. §7412), and (F) any imminently hazardous chemical substance or mixture with respect to which the Administrator (of EPA) has taken action pursuant to section 2606 of Title 15. The term does not include petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a *hazardous substance* under subparagraphs (A) through (F) of this paragraph, and the term does not include natural gas, natural gas liquids, liquefied natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas).

Hazardous Waste — any hazardous waste having the characteristics identified under or listed pursuant to section 3001 of RCRA, as amended, (42 U.S.C. §6921) (but not including any waste the regulation of which under RCRA (42 U.S.C. §6901-6992k) has been suspended by Act of Congress). RCRA is sometimes also identified as the Solid Waste Disposal Act. RCRA defines a hazardous waste, at 42 U.S.C. §6903, as: “a solid waste, or combination of solid wastes, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may—(A) cause, or significantly contribute to an increase in mortality or an increase in serious irreversible, or incapacitating reversible, illness; or (B) pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed.”

Historical Recognized Environmental Condition (HREC) — a previous release of *hazardous substances or petroleum products* affecting the *subject property* that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the *subject property* to any controls (for example, AULs or other *property use limitations*). A *historical recognized environmental condition* is not a *recognized environmental condition*.

IC/EC registries — databases of institutional controls or engineering controls that may be maintained by a federal, state or local environmental agency for purposes of tracking sites that may contain residual contamination and AULs. The names for these may vary from program to program and state to state, and include terms such as Declaration of Environmental Use Restriction database (Arizona), list of “deed restrictions” (California), environmental real covenants list (Colorado), brownfields site list (Indiana, Missouri) and the Pennsylvania Activity and Use Limitation (PA AUL) Registry.

Innocent Landowner Defense — (42 U.S.C. §9601(35) & 9607(b)(3)) — a person may qualify as one of three types of innocent landowners: (i) a person who “did not know and had no reason to know” that contamination existed on the property at the time the purchaser acquired the property; (ii) a government entity which acquired the property by escheat, or through any other involuntary transfer or acquisition, or through the exercise of eminent domain authority by purchase or condemnation; and (iii) a person who “acquired the facility by inheritance or bequest.” To qualify for the first type of innocent landowner LLP, such person must have made all appropriate inquiries on or before the date of purchase. Furthermore, the all appropriate inquiries must not have resulted in knowledge of the contamination. If it does, then such person did “know” or “had reason to know” of contamination and would not be eligible for the innocent landowner defense.

Institutional Controls — a legal or administrative restriction (for example, “deed restrictions,” restrictive covenants, easements, or zoning) on the use of, or access to, a site or facility to (1) reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil or groundwater on the property, or (2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. An institutional control is a type of Activity and Use Limitation (AUL).

Key Site Manager — the person identified by the owner or operator of a property as having good knowledge of the uses and physical characteristics of the property.

Landowner Liability Protections — landowner liability protections (LLPs) include the bona fide prospective purchaser liability protection, contiguous property owner liability protection, and innocent landowner defense from CERCLA liability (42 U.S.C. §§9601(35)(A), 9601(40), 9607(b), 9607(q), 9607(r)).

Major Occupants — those tenants, subtenants, or other persons or entities each of which uses at least 40 % of the leasable area of the property or any anchor tenant when the property is a shopping center.

Material Threat — a physically observable or obvious threat which is reasonably likely to lead to a release that, in the opinion of the environmental professional, is threatening and might result in impact to public health or the environment. An example might include an aboveground storage tank system that contains a hazardous substance and which shows evidence of damage. The damage would represent a material threat if it is deemed serious enough that it may cause or contribute to tank integrity failure with a release of contents to the environment.

Migrate/Migration — the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface.

Petroleum Products — those substances included within the meaning of the petroleum exclusion to CERCLA, 42 U.S.C. §9601(14), as interpreted by the courts and EPA, that is: petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance under Subparagraphs (A) through (F) of 42 U.S.C. §9601(14), natural gas, natural gas liquids, liquefied natural gas, and synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas).

Pits, Ponds, or Lagoons — man-made or natural depressions in a ground surface that are likely to hold liquids or sludge containing hazardous substances or petroleum products.

Practically Reviewable — information that is practically reviewable means that the information is provided by the source in a manner and in a form that, upon examination, yields information relevant to the property without the need for extraordinary analysis of irrelevant data. The form of the information shall be such that the user can review the records for a limited geographic area. Records that cannot be feasibly retrieved by reference to the location of the property or a geographic area in which the property is located are not generally practically reviewable. Further, when so much data is generated that it cannot be feasibly reviewed for its impact on the property, it is not practically reviewable.

Property Use Limitation — limitation or restriction on current or future use of a property in connection with a response to a release, in accordance with the applicable regulatory authority or authorities that allows hazardous substances or petroleum products to remain in place at concentrations exceeding unrestricted use criteria.

Publicly Available — information that is publicly available means that the source of the information allows access to the information by anyone upon request.

Reasonably Ascertainable — for purposes of both the ASTM Phase I ESA (Practice E 1527) and the TSA (Practice E 1528) standards, information that is (1) publicly available, (2) obtainable from its source within reasonable time and cost constraints, and (3) practically reviewable.

Recognized Environmental Condition (REC) — (1) the presence of *hazardous substances or petroleum products* in, on, or at the *subject property* due to a *release* to the *environment*; (2) the likely presence of *hazardous substances or petroleum products* in, on, or at the *subject property* due to a *release* or *likely release* to the *environment*; or (3) the presence of *hazardous substances or petroleum products* in, on, or at the *subject property* under conditions that pose a *material threat* of a future *release* to the *environment*.

Release — any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment (including the abandonment or discharging of barrels, containers, and other closed receptacles containing any hazardous substances or pollutant or contaminant).

Relevant Experience — as used in the definition of environmental professional, means: participation in the performance of environmental site assessments that may include environmental analyses, investigations, and remediation which involve the understanding of surface and subsurface environmental conditions and the processes used to evaluate these conditions and for which professional judgment was used to develop opinions regarding conditions indicative of releases or threatened releases (per §312.1(c)) to the subject property.

Significant Data Gap — a data gap that affects the ability of the environmental professional to identify a recognized environmental condition.

Site Reconnaissance — that part that is contained in ASTM Practice E1527 and addresses what should be done in connection with the *site visit*. The *Site Reconnaissance* includes, but is not limited to, the *site visit* done in connection with a Phase I Environmental Site Assessment.

Site Visit — the visit to the property during which observations are made as part of the *Site Reconnaissance*.

Subject Property — the real property that is the subject of this Phase I ESA. Real property includes buildings and other fixtures and improvements located on the property and affixed to the land.

Sump — a pit, cistern, cesspool, or similar receptacle where liquids drain, collect, or are stored.

Underground Storage Tank (UST) — any tank, including underground piping connected to the tank, that is or has been used to contain hazardous substances or petroleum products and the volume of which is 10% or more beneath the surface of the ground.

User — the party seeking to use ASTM E1527-21 to complete a Phase I ESA of the subject property. A User may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager.

User's Responsibilities — ASTM E1527-21 describes specific tasks to be performed by the Client/User that will help identify the possibility of RECs in connection with the subject property and which a) do not require the technical expertise of an environmental professional (EP) and b) are generally not performed by EPs performing a Phase I ESA. These tasks include communicating to the EP any specialized or actual knowledge or experience the Client/User may have with respect to the property, the relationship of the purchase price to the fair market value of the property, and the reason for conducting the Phase I ESA. Additionally, under ASTM E1527-21, it is the Client/User's responsibility to either: 1) engage a title company or title professional to undertake a review of reasonably ascertainable recorded land title records and lien records for environmental liens or AULs currently recorded against or relating to the property, or 2) negotiate such an engagement of a title company or title professional as an addition to the scope of the Phase I ESA activities.

Vapor Encroachment Condition (VEC) — the presence or likely presence of COC vapors in the subsurface of the subject property caused by the release of vapors from contaminated soil or groundwater or both either on or near the property.

Wastewater — water that (1) is or has been used in an industrial or manufacturing process, (2) conveys or has conveyed sewage, or (3) is directly related to manufacturing, processing, or raw materials storage areas at an industrial plant. Wastewater does not include water originating on or passing through or adjacent to a site, such as stormwater flows, that has not been used in industrial or manufacturing processes, has not been combined with sewage, or is not directly related to manufacturing, processing, or raw materials storage areas at an industrial plant.

(12/13)

18.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

ELEANORE J. RAMSEY, G.I.T.

Associate

Technical Expertise

Ms. Ramsey is a registered Geologist-In-Training (G.I.T.) with over 17 years of experience ranging from Phase I and II Environmental Site Assessments (ESAs) and conducting research in support of Phase I ESAs to performing geotechnical field work. She has expertise in all aspects of ASTM E1527 Phase I ESA research activities and report preparation, including aerial photograph analysis, historical research, interviews, and regulatory agency file review.

Experience Summary

Since 2002, Ms. Ramsey has conducted or supported a variety of Phase I and II ESAs for a wide variety of properties, including undeveloped land, watersheds, developed urban properties, residential properties, commercial developments and industrial properties in the western U.S. She is very knowledgeable with the ASTM E1527 standard, including the most recent revision (E1527-21), and is proficient in identifying potential environmental concerns. Ms. Ramsey has also assisted clients with regulatory compliance, including UIC (drywell) compliance and stormwater regulations. She has maintained agency contact lists and databases, and has performed geotechnical data collection, site mapping, and report preparation. Ms. Ramsey participated in field research in Antarctica with duties including multi-stream aerogeophysical (airplane-based) data collection and field research in remote and harsh conditions.

Credentials

B.S. Geology, Bowling Green State University, Bowling Green, Ohio
Graduate Work in Geophysics, University of California, Santa Barbara, California

Professional Titles and Registrations

- Oregon Geologist in Training (G.I.T.)

Selected Professional Training

- OSHA 40-Hour HAZMAT Training and Annual 8-Hour Updates
- Environmental Data Resources, Inc. Due Diligence at Dawn Seminars
- Environmental Data Resources, Inc. Upcoming Revisions to ASTM E1527
- Environmental Data Resources, Inc. Vapor Intrusion and Environmental Liability
- Various Webinars: Ongoing continuing education regarding current and newly identified potential environmental concerns

Employment History

| Cotton, Shires & Associates | Staff Geologist | 2001 to 2002 |

(02/23)

GARY W. HAHN, E.P.

President, Principal

Technical Expertise

Mr. Hahn is a qualified Environmental Professional (E.P.), with technical expertise in managing the day-to-day operations of a regionally-based environmental consulting firm that specializes in site assessment, investigation, and remediation of contaminated properties.

Experience Summary

Mr. Hahn has owned and managed Hahn and Associates, Inc. since its inception in 1987, and has provided environmental regulatory assistance and site assessment activities for industry and government, as well as overseeing the design and implementation of environmental compliance programs and the management of environmental cleanup projects for over 40 years.

Credentials

B.S. Chemistry, Case Western Reserve University

Professional Titles and Affiliations

- Past Member, Board of Directors, The Wetlands Conservancy
- Past Member, Board of Directors, Oregon Association of Environmental Professionals
- Board Member, The Seva Foundation

AND: CLAUQUATO CEMETERY ASSOCIATION ("Client")
P.O. Box 1443
Chehalis, Washington 98532

HAI agrees to provide services and Client agrees to purchase services as follows:

A. SCOPE OF SERVICES AND PERFORMANCE SCHEDULE

1. HAI will conduct a review and inspection of the property located at the Approximately 0.37-Acre Claquato Church Property, 125 Water Street, Chehalis, Lewis County, Washington. The review and inspection activities will meet the requirements of the American Society for Testing and Materials (ASTM) standard E 1527-21 entitled *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, as detailed in the attached *Scope of Work for Phase I Environmental Site Assessments*. Further, unless otherwise directed and as appropriate, HAI may include recommendations in the report to address any identified *Recognized Environmental Conditions (RECs)*.

Unless specifically noted herein, the review and inspection activities will not include items that are outside the scope of ASTM standard E1527-21 ("non-scope considerations"). Non-scope considerations include, but are not limited to, the interpretation of geological or hydrogeological information, issues related to lead-based paint, lead in drinking water, electromagnetic frequencies, cultural and/or historic resources, indoor air quality (e.g. vapor intrusion), fungi (e.g. mold), radon, wetlands, ecological resources, endangered species, and the National Environmental Policy Act (NEPA). Additional non-scope considerations also include surveys for asbestos or vapor encroachment conditions (ASTM E2600-10), imported fill materials, health and safety, industrial hygiene, geotechnical features, and regulatory compliance, or a determination of the suitability of a property or its structures for any purpose.

NOTE: the preceding list of non-scope considerations is not intended to be all-inclusive. Further, no implication is intended as to the relative importance of inquiry into such non-scope considerations.

- 2. Upon completion of the Services or the earlier termination of this agreement, HAI shall prepare a written report, documenting the Services performed, which will include copies of all laboratory analyses that are performed, if any.
- 3. Performance of the Services commenced on August 8, 2025 and shall be diligently continued until completed.

B. COMPENSATION

All Services shall be compensated in accordance with the terms and conditions of the attached General Terms and Conditions. The total cost to complete the indicated work, on a Flat Fee basis, will be \$4,000, including travel-related expenses. This fee assumes the following:

- Title Report (current within the past six months) will be provided to HAI that will include the required search for recorded environmental liens and activity and use limitations (AULs).
- Report Revisions or Amendments after the reports are submitted, and as a result of information not available to HAI during the project, will be charged on a time and materials (T&M) basis, in addition to the quoted flat fee

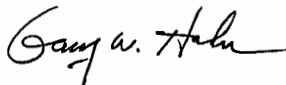

C. SPECIAL PROVISIONS

None

D. STANDARD TERMS AND CONDITIONS

All the terms and conditions in the attached General Terms and Conditions and any attached exhibits and schedules are incorporated into this Agreement by this reference.

HAHN AND ASSOCIATES, INC.
SERVICES AGREEMENT
AGREEMENT NO. 10038

GENERAL TERMS AND CONDITIONS

1. Services Defined. Hahn and Associates, Inc. (HAI) shall perform services for Client according to the scope of work and performance schedule described in Paragraph A of this Agreement (the "Services").

2. Changes to Services. The scope of work may be changed only by mutual agreement of the parties. If either party desires to change the scope of the Services or the performance schedule, the party desiring such a change shall submit a Change Order to the other party for approval pursuant to this section. A Change Order shall describe the desired change and the reason for the change. Upon execution by, and delivery to, both parties of duplicate originals of the Change Order, it shall become an amendment to this Agreement. In circumstances when both parties desire to enter into a Change Order before a written Change Order can be prepared and executed, the parties may proceed on the basis of a verbal or e-mail Change Order agreed to by both parties and to be documented in writing at the earliest time practicable.

3. Charges and Payment.

3.1 Client shall pay for all Services at the rates set forth in Paragraph B of this Agreement.

3.2 Client agrees to pay HAI for all expenses related to the Services, which expenses may include, without limitation; travel (including local travel), meals and lodging expenses; expenses for reproductions, deliveries, supplies, equipment rental, taxes and freight; and subcontractor charges. All such expenses shall be billed to Client at HAI's cost plus 15 percent.

3.3 Invoices will be submitted once per month. All invoices shall be past due 30 days after the date of the invoice. HAI may assess to Client a late-payment charge for any invoiced amount not paid within 30 days after the date of the invoice, which charge shall be equal to 1.5 percent per month (but not exceeding the maximum allowable by law) of the unpaid amount from the date of the invoice until paid. Such late-payment charge shall be in addition to, and not in lieu of, any other rights and remedies HAI may have under applicable laws or this Agreement.

3.4 In the event of a dispute to a billing, only that disputed portion will be withheld from payment, and the undisputed portion will be paid. Client will exercise reasonableness in disputing any bill or portion thereof. No interest will accrue on any disputed portion of the billing until mutually resolved.

4. Duration of Agreement and Termination.

4.1 This Agreement shall commence on the date it is executed by both parties and shall continue in effect until the Services have been performed and all payments received, unless sooner terminated by either party, with or without cause, by seven days written notice to the other. In the event the Services have been commenced prior to the execution of this Agreement, this Agreement shall be effective retroactively to the date the Services were commenced.

4.2 Upon termination of this Agreement, HAI shall prepare a final invoice for all Services performed to the date of termination, and Client shall pay such invoice pursuant to the terms of Section 2 above. If such termination is at the request of Client or is at the request of HAI because of Client's default, HAI may assess Client a

termination charge for fees and expenses HAI incurs to effect the termination, which may include, without limitation, the cost of irretrievably committed resources, completion of documentation HAI considers necessary to protect its professional reputation, un-recovered proposal and presentation costs and administrative and overhead costs.

5. Warranty and Limitations of Liability

5.1 HAI warrants that the Services shall satisfy the standards of care, skill and diligence ordinarily provided by a professional in the performance of similar services as of the time HAI performs the Services. This warranty is in lieu of and excludes all other warranties, whether express or implied, by operation of law or otherwise. No other warranties or representation, either express or implied, is included or intended in any of HAI's brochures, proposals or reports. Environmental investigations are not exhaustive and uncertainty cannot be eliminated.

5.2 HAI's liability with respect to this Agreement or the performance of the Services shall not exceed the lesser of \$25,000 or the total amount paid by Client for Services under this Agreement. HAI shall not be liable for any incidental, consequential or special damages. These limitations shall apply to any liability of HAI, whether arising under contract, tort or any other legal or equitable theory.

5.3 No action relating to Services performed under this Agreement may be brought by either party more than one year after the date such Services are performed, except that an action for nonpayment may be brought within two years of the date of the last payment.

6. Indemnity. Client shall defend, indemnify and hold harmless HAI and its officers, directors, employees, subcontractors and agents against and from any and all causes of action, suits, demands, costs, claims, damages, losses, liability, fines and expenses, direct or indirect, (including but not limited to attorney's fees at trial and on any appeal or petition for review) (collectively "Claims") for, or on account of, personal injury, illness or death, property damage or governmental order, relating to the Services and arising out of or attributable to any hazardous or toxic substance, waste or material or any other pollutant or contaminant. To the fullest extent permitted by law, this subsection shall apply regardless of the fault, negligence, breach of warranty or contract, or strict liability of HAI, except to the extent of HAI's gross negligence or willful misconduct.

7. Samples; Wastes. Any soil, water and other samples shall be collected by HAI as agent for Client, and Client shall be deemed the sample collector under 40 CFR Section 261.4(d). Any wastes (including without limitation, samples, drill cuttings, produced water, excavated material, and contaminated equipment and materials) generated in connection with the Services shall be deemed generated by Client, and Client shall be responsible for the proper disposal of such wastes, unless such disposal is specifically included in the description of the Services. Unless Client and HAI otherwise agree in writing, HAI may return all such wastes to Client at Client's expense, and Client shall reimburse HAI for the cost of all equipment or materials that becomes contaminated and must be disposed.

8. Hazardous Substances. Client represents and warrants that it has informed HAI in writing of any hazardous substances Client knows or suspects are present on the property to be addressed by the Services. Client agrees that HAI shall have no responsibility for any hazardous substances present on such property.

9. Responsibility for Access and Information. Client shall secure for HAI the right of access to the property upon which or for which the services are to be performed and shall provide HAI with copies of all plans, environmental records and reports, and other information and documentation in its possession that may be relevant to the performance of the Services. Client assumes responsibility for all personal injury, death and property damage that may be caused by HAI's interference with subterranean structures, utilities, tanks, wastes or conditions not accurately shown on plans provided by Client or otherwise not accurately located by written notice to HAI, unless such interference is caused by the gross negligence or willful misconduct of HAI. Client acknowledges that the nature of the Services will involve some damage or destruction of property, and that HAI shall have no responsibility or liability with respect to such damage or destruction, except to the extent caused by the gross negligence or willful misconduct of HAI.

10. Ownership of Documents. All designs, drawings, specifications, notes, data, report reproductions and other work developed by HAI shall remain HAI's property. HAI will retain all pertinent summaries and reports relating to the services performed for a period of at least two years following submission of the report, during which period the records will be made available to Client at all reasonable times. HAI reserves the right to discard at any time field notes, laboratory test sheets, calculation sheets, etc.

11. Confidentiality.

11.1 Any information disclosed under this Agreement that either party wishes to keep confidential ("Confidential Information") shall be clearly labeled and identified as Confidential Information by the disclosing party at the time of disclosure. At Client's written request, any documents, materials, information or reports collected or generated by HAI in connection with the Services shall be treated as Confidential Information.

11.2 Each party shall handle Confidential Information received from the other party in the same manner as the receiving party handles its own Confidential Information. Disclosure of Confidential Information shall be restricted to those individuals who need access to such Confidential Information as needed to ensure proper performance of the Services.

11.3 Neither party shall be liable for disclosure or use of Confidential Information which: (1) was known by the receiving party at the time of the disclosure due to circumstances or events unrelated to this Agreement; (2) is already part of the public domain; (3) is disclosed with the prior written approval of the disclosing party; (4) is required to be released by law or court order.

12. Conflict of Interest. Client acknowledges that HAI provides similar services for a broad range of other clients and agrees that HAI shall be free to work for other clients in matters that do not directly relate to the specific facts or circumstances for which the Services are provided by HAI to Client under this Agreement. In providing services for other clients, HAI will not use any Confidential information of Client without Client's consent.

13. Use of Work Product for Issuance or Sale of a Security. Under no circumstances is the Client or anyone acting through, with, or on behalf of the Client, permitted to use any work product of HAI (or its employees or subconsultants under this Agreement) in connection with any sale or offering for sale of securities, including, without

limitation, stock, bonds, notes, or any other instruments or transactions which call for investments, loans, or other transfers of money to Client without HAI's prior written authorization.

14. General.

14.1 HAI shall have the right to engage subcontractors (including corporations affiliated with or related to HAI) to assist it in the performance of the Services. HAI reserves the right to change at its sole discretion the personnel it assigns to the performance of the Services.

14.2 No party to this Agreement shall be considered in default in the performance of its obligations under this Agreement, except with respect to the obligations to make payments pursuant to Sections 2 and 5, to the extent that the performance of any such obligation is prevented or delayed by acts of God or a public enemy, restraints of the government, strikes or any causes of any nature, whether similar or dissimilar to the causes listed, that could not with reasonable diligence be controlled or prevented by the party whose performance is prevented or delayed.

14.3 In making and performing this Agreement, the parties are independent contractors, and at no time shall either party make any commitments or incur any charges or expenses for or in the name of the other party without prior written consent.

14.4 All notices and payments under this Agreement shall be personally delivered or sent by first-class mail, postage prepaid, addressed to the other party at the address set forth above or as otherwise designated in writing to the other party. All notices shall be in writing. Notices shall be deemed given when received and shall be deemed received when personally delivered or 48 hours after they are postmarked, if sent by mail.

14.5 If in any judicial proceeding a court shall refuse to enforce all the provisions of this Agreement, the scope of any unenforceable provision shall be deemed modified and diminished to the extent necessary to render such provision valid and enforceable. In any event, the validity or enforceability of any such provision shall not affect any other provision of this Agreement, and this Agreement shall be construed and enforced as if such provision had not been included.

14.6 This Agreement and any referenced attachments, exhibits or schedules (which are incorporated herein by this reference) are the entire agreement between the parties and supersede all previous agreements or understandings between them. This Agreement may be modified only in writing, signed by both parties, except as described in Section 2 above.

14.7 Waiver by either party of any breach of this Agreement shall not be construed as a waiver of any other breach. The parties' remedies under this Agreement are not exclusive, but are in addition to all other remedies in favor of each party as provided in this Agreement or at law or equity.

14.8 If any suit or action is filed by any party to enforce or interpret a provision of this Agreement or otherwise with respect to the subject matter of this Agreement, the prevailing party shall be entitled, in addition to other rights and remedies it may have, to reimbursement for its expenses incurred with respect to such suit or action, including court costs and reasonable attorneys' fees at trial, on appeal and in connection with any petition for review.

14.9 If HAI or any of its employees are subpoenaed or otherwise compelled by law to testify or produce documents in connection with the Services, Client agrees to compensate HAI for its staff time and expenses according to HAI's then current rates.

14.10 This Agreement gives no rights or benefits to parties other than HAI and Client and has no third party beneficiaries. All reports, recommendations and other documents prepared by HAI under this Agreement are intended solely for Client's use with respect to the property and matters specifically addressed by the Services. Any use by persons other than Client and any reuse by Client for purposes outside this Agreement shall be at the user's sole risk.

14.11 This Agreement shall be governed by and construed under the laws of the State of Oregon.

14.12 In the event that groundwater monitoring wells are to be installed, altered or abandoned, that work will be completed, if within the State of Oregon, in accordance with Oregon Groundwater Law (ORS Chapter 537) and the Rules for the Construction and Maintenance of Monitoring Wells and Other Holes in Oregon (OAR Chapter 690, Division 240).

14.13 As between Client and HAI, Client shall have the primary obligation, if any, to report to the appropriate governmental authorities the presence of contamination on the subject property. Client acknowledges, however, that HAI may be required by applicable laws to report to governmental authorities contamination of which it becomes aware during the performance of the Services. Before making any such reports, HAI will notify the Client and allow the Client at least 24 hours to make the report itself, to the extent such delay is consistent with any reporting obligations and the protection of human health, welfare and the environment.

HAHN AND ASSOCIATES, INC.

ENVIRONMENTAL CONSULTANTS

Assessment Investigation Remediation

July 29, 2025

Ms. Lacie Jendryka
Claquato Cemetery
P.O. Box 1443
Chehalis, Washington 98532

**SUBJECT: Proposal for Phase I Environmental Site Assessment,
Approximately 0.37-Acre Property,
Claquato Church Property
Chehalis, Lewis County, Washington**

Dear Ms. Jendryka:

At your request, Hahn and Associates, Inc. (HAI) has prepared a proposal and cost estimate for Phase I Environmental Site Assessment (ESA) activities at the above-referenced property. The purpose of a Phase I ESA is to identify environmental concerns that may present a potential liability to the current owner or to a prospective purchaser of the property. Environmental concerns identified in association with the property will be presented in the report as *Recognized Environmental Conditions* (RECs), that is the presence or likely presence of contamination resulting from hazardous materials, including petroleum products at the property. Further, unless otherwise directed and as appropriate, HAI will include recommendations in the report to address any identified RECs.

Scope of Work

It is proposed that the subject property be evaluated for environmental hazards and that the Phase I ESA report be prepared for the property in accordance with the current ASTM standard (E1527-21) entitled *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The U.S. Environmental Protection Agency (EPA) has stated that ASTM E1527-21 may be used to comply with meeting the objectives and performance factors of 40 CFR Part 312 Standards for All Appropriate Inquiries, Final Rule (40 CFR 312.11) which became effective November 1, 2006. For more detail, refer to the attached *Scope of Work for Phase I Environmental Site Assessments* (SOW).

Additional Environmental Concerns / Non-Scope Considerations

Beyond the Phase I ESA work, there may be additional environmental concerns that are associated with a property which may contribute to environmental risk but which are outside of the scope of the Phase I ESA ("non-scope considerations"). Non-scope considerations may include, but are not limited to, surveys for asbestos, lead-based paint, drinking water quality, indoor air quality (e.g. vapor intrusion) (including radon and urea formaldehyde), fungi (e.g. mold), occupational health and safety, wetlands and other ecological resources, electromagnetic radiation, cultural and/or historic resources, and environmental regulatory compliance generally. The Phase I ESA work activities also do not include surface or subsurface investigations, including sampling and analyses, which would be necessary to determine the actual presence of contamination

on or beneath a property. However, these environmental risk issues can be addressed separately and in addition to the Phase I ESA, at the request of the Client.

NOTE that no implication is intended as to the relative importance of inquiry into such non-scope considerations, and that the preceding list of non-scope considerations is not intended to be all-inclusive.

Fee

The indicated Phase I ESA work can be completed for a flat fee of \$4,000, which includes a Reliance Letter, if requested. This fee assumes the following:

- Title Report (current within the past six months) will be provided to HAI that will include the required search for recorded environmental liens and activity and use limitations (AULs).
- Report Revisions or Amendments after the report is submitted, and as a result of information not available to HAI during the project, will be charged on a time and materials (T&M) basis, in addition to the quoted flat fee
- Lender Requirements above and beyond the standard scope of a Phase I ESA (ASTM E1527) may incur further costs in addition to the quoted flat fee

Schedule

The Phase I ESA report can be completed within approximately 25 business days of the authorization to proceed, depending upon HAI's workload at the time of assignment. One (1) electronic copy (PDF) of the report will be provided.

If the project is authorized and subsequently cancelled before the submission of the final report, there will be a minimum charge of \$500, and up to the full fee amount, depending on the accrued fees and expenses.

This proposal is valid for thirty (30) days from the date of this letter. At your direction, HAI is ready to proceed with the indicated work activity. If there are any comments or questions, please contact either the undersigned or Mr. Gary Hahn (garyh@hahnenv.com), President of HAI. Thank you for the opportunity to present this information.

Sincerely,

Nora Eskes, E.P.
Principal

norae@hahnenv.com
971.336.3106

**SCOPE OF WORK FOR
PHASE I ENVIRONMENTAL SITE ASSESSMENTS**

(08/22)

Purpose

The purpose of a Phase I Environmental Site Assessment (ESA) is to identify potential *Recognized Environmental Conditions* (RECs) that could present a liability to a property owner or to a prospective purchaser of the property. The historical and current uses of a property are researched to evaluate the need for further work.

Potential RECs that may be identified during the Phase I ESA include:

- Known or suspect areas of Hazardous Substances usage
- Hazardous and non-Hazardous Waste disposal
- Evidence of Underground Storage Tanks (USTs) (current or historical)
- Evidence of Polychlorinated Biphenyls (PCBs)
- Historical practices that could result in Environmental Liability
- Areas of Potential Contamination

National Standard

The task items noted below have been designed to follow the American Society for Testing and Materials (ASTM) guideline (E1527-21) entitled *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, and to meet the requirements of the federal *All Appropriate Inquiries* (AAI) rule. **NOTE:** for the purposes of Landowner Liability Protections under federal law, the Phase I ESA report is valid for a period of 180 days from the date of completion of the first of four main *All Appropriate Inquiries* (AAI) components. For extended viability beyond 180 days, the report may be updated within one year of the initial completion of the first of the four AAI components.

Report

The product of the Phase I ESA will be a written report containing maps, diagrams, photographs and descriptions of environmental conditions encountered during the Phase I ESA, along with any RECs.

TASK 1 RECORDS REVIEW

Internal File Review – Pertinent Client and/or tenant records, if any and as made available, will be reviewed. In particular, the following types of records will be requested for review:

- Construction Plans
- Material Safety Data Sheets (MSDSs)
- Asbestos Surveys
- Hazardous Substance Usage, Release and Remediation Reports
- Prior ESAs: Information from prior ESAs (I and II) may be used
- Environmental Regulatory Permits
- Waste Characterization / Disposal Records
- Geotechnical Studies

Physical Setting / Environmental Condition Sources — Documentation pertaining to the physical or environmental conditions on the property will be reviewed, as available from the U.S. Geological Survey (USGS), the Army Corps of Engineers, and/or city and county agencies.

Historical Review — A historical background search will be conducted, including a review of the readily available data on historical land use practices at the property and the surrounding area. Common sources that may be used, if readily available, include but are not limited to:

- Facility construction plans
- Land ownership maps/land use records/building permits and plans/tax record files
- Historical aerial photographs/historical topographic maps
- Records regarding UST installation or decommissioning, in particular Fire department records

Agency File Review — Readily available records at local municipal agencies and/or the local office of the state environmental agency will be reviewed, as needed, to identify inspections, permits, notifications, orders or penalties for the property.

Regulatory Database Review — Federal, state and tribal environmental databases will be reviewed for facilities listed within the ASTM-prescribed radius (1.0 mile or less) of the subject property:

- Federal National Priority List (NPL) and Delisted NPL sites lists
- Federal Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) lists
- Federal Resource Conservation Recovery Act (RCRA) list of Treatment, Storage, and Disposal (TSD) Facilities subject to corrective action under RCRA (CORRACTS)
- Federal RCRA non-CORRACTS TSD facilities and RCRA generators lists
- Federal Emergency Response Notification System (ERNS) list
- State/Tribal-equivalent NPL and CERCLIS lists; landfill/solid waste disposal sites list; Leaking Underground Storage Tank (LUST) list; registered UST list

TASK 2 SITE RECONNAISSANCE

A site reconnaissance will be conducted to identify visual indications of past or present activities which could pose a risk of contamination. The site reconnaissance will include the following:

- A physical site visit (walk-through) to identify potential on-site sources of contamination
- Visual observations of evidence of USTs, suspected PCB-contaminated equipment, waste disposal areas, surface water drainages, and potential Hazardous Substance contamination
- Review of appropriate land use maps to identify known contaminated areas and USTs in the surrounding area
- Identification of potential off-site sources of contamination from surrounding land uses
- Photography of environmental features of the property, for inclusion in the report
- Visual observations of potential Underground Injection Controls (UICs)
- Visual observations of suspect asbestos-containing materials (ACMs) at the property

TASK 3 INTERVIEWS

As available, individuals likely to have knowledge of the current and/or historical operational practices at the property will be interviewed. Such knowledgeable individuals may include some or all of the following:

- Client or "User" of the Phase I ESA
- Government Agency Personnel
- Current / Historical Owners, Tenant(s), Neighbors

TASK 4 REPORT PREPARATION

A comprehensive report will be prepared upon completion of the Site Reconnaissance, Records Review, and Interview task items. The report will serve as a consolidated gathering of the data that was obtained, and will detail the resultant findings and conclusions.

EXCLUSIONS

Unless otherwise specified or requested by the Client, the Phase I ESA activities will not include additional environmental concerns that are outside of the scope of the Phase I ESA ("non-scope considerations"). No implication is intended as to the relative importance of inquiry into such non-scope considerations, and the following list of non-scope considerations is not intended to be all-inclusive:

- Interpretation of geological or hydrogeological information
- Asbestos, lead-based paint, lead in drinking water, electromagnetic radiation, indoor air quality (e.g. radon), fungi (e.g. mold), geotechnical or wetland surveys, industrial hygiene, health and safety issues
- Identification of non-native materials or imported fill on a property, unless identified via interviews, the records review, or site visit
- Emerging contaminants (e.g. *Per- and Polyfluoroalkyl Substances* (PFAS)) or substances not defined as *Hazardous Substances*)
- Regulatory compliance assessment with respect to subject property activities
- Cultural / Historical resources, endangered species, National Environmental Policy Act (NEPA) issues
- Chain of Title or Title Report, or determination of suitability of a property or its structures for any purpose

Appendix B
User Questionnaire

PHASE I ENVIRONMENTAL SITE ASSESSMENT USER QUESTIONNAIRE

(Required by ASTM E1527-21)

Property: Approximately 0.37-Acre Claquato Church Property, 125 Water Street,
Chehalis, Lewis County, Washington

HAI Project No. 10038

The party who will be the *User* of the Phase I ESA should provide the following information, if available. Failure to do so could result in a determination that "All Appropriate Inquiry" is not complete, thereby putting your Landowner Liability Protections at risk. Accordingly, please fill in this form to the best of your ability. Explain any Yes answers to 6b, 7b, 8b, 9, 10a, b, c or d, and 11 on a separate sheet of paper. Then sign this form and return it to HAI along with copies of any of the available documents or information. This form will be made a part of the completed Phase I ESA Report to be prepared by Hahn and Associates, Inc.

AMENDED ALTA COMMITMENT FOR TITLE INSURANCE
issued by
FIRST AMERICAN TITLE INSURANCE COMPANY

NOTICE

IMPORTANT—READ CAREFULLY: THIS COMMITMENT IS AN OFFER TO ISSUE ONE OR MORE TITLE INSURANCE POLICIES. ALL CLAIMS OR REMEDIES SOUGHT AGAINST THE COMPANY INVOLVING THE CONTENT OF THIS COMMITMENT OR THE POLICY MUST BE BASED SOLELY IN CONTRACT.

THIS COMMITMENT IS NOT AN ABSTRACT OF TITLE, REPORT OF THE CONDITION OF TITLE, LEGAL OPINION, OPINION OF TITLE, OR OTHER REPRESENTATION OF THE STATUS OF TITLE. THE PROCEDURES USED BY THE COMPANY TO DETERMINE INSURABILITY OF THE TITLE, INCLUDING ANY SEARCH AND EXAMINATION, ARE PROPRIETARY TO THE COMPANY, WERE PERFORMED SOLELY FOR THE BENEFIT OF THE COMPANY, AND CREATE NO EXTRACTIONAL LIABILITY TO ANY PERSON, INCLUDING A PROPOSED INSURED.

THE COMPANY'S OBLIGATION UNDER THIS COMMITMENT IS TO ISSUE A POLICY TO A PROPOSED INSURED IDENTIFIED IN SCHEDULE A IN ACCORDANCE WITH THE TERMS AND PROVISIONS OF THIS COMMITMENT. THE COMPANY HAS NO LIABILITY OR OBLIGATION INVOLVING THE CONTENT OF THIS COMMITMENT TO ANY OTHER PERSON.

COMMITMENT TO ISSUE POLICY

Subject to the Notice; Schedule B, Part I—Requirements; Schedule B, Part II—Exceptions; and the Commitment Conditions, First American Title Insurance Company, a Nebraska Corporation (the "Company"), commits to issue the Policy according to the terms and provisions of this Commitment. This Commitment is effective as of the Commitment Date shown in Schedule A for each Policy described in Schedule A, only when the Company has entered in Schedule A both the specified dollar amount as the Proposed Amount of Insurance and the name of the Proposed Insured.

If all of the Schedule B, Part I—Requirements have not been met within six months after the Commitment Date, this Commitment terminates and the Company's liability and obligation end.

FIRST AMERICAN TITLE INSURANCE COMPANY

TITLE GUARANTY CO. OF LEWIS COUNTY
Company Name

CHEHALIS, WA
City, State

This page is only a part of a 2021 ALTA Commitment for Title Insurance [issued by First American Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I—Requirements; and Schedule B, Part II—Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

COMMITMENT CONDITIONS

1. DEFINITIONS

- a. "Discriminatory Covenant": Any covenant, condition, restriction, or limitation that is unenforceable under applicable law because it illegally discriminates against a class of individuals based on personal characteristics such as race, color, religion, sex, sexual orientation, gender identity, familial status, disability, national origin, or other legally protected class.
- b. "Knowledge" or "Known": Actual knowledge or actual notice, but not constructive notice imparted by the Public Records.
- c. "Land": The land described in Item 5 of Schedule A and improvements located on that land that by State law constitute real property. The term "Land" does not include any property beyond that described in Schedule A, nor any right, title, interest, estate, or easement in any abutting street, road, avenue, alley, lane, right-of-way, body of water, or waterway, but does not modify or limit the extent that a right of access to and from the Land is to be insured by the Policy.
- d. "Mortgage": A mortgage, deed of trust, trust deed, security deed, or other real property security instrument, including one evidenced by electronic means authorized by law.
- e. "Policy": Each contract of title insurance, in a form adopted by the American Land Title Association, issued or to be issued by the Company pursuant to this Commitment.
- f. "Proposed Amount of Insurance": Each dollar amount specified in Schedule A as the Proposed Amount of Insurance of each Policy to be issued pursuant to this Commitment.
- g. "Proposed Insured": Each person identified in Schedule A as the Proposed Insured of each Policy to be issued pursuant to this Commitment.
- h. "Public Records": The recording or filing system established under State statutes in effect at the Commitment Date under which a document must be recorded or filed to impart constructive notice of matters relating to the Title to a purchaser for value without Knowledge. The term "Public Records" does not include any other recording or filing system, including any pertaining to environmental remediation or protection, planning, permitting, zoning, licensing, building, health, public safety, or national security matters.
- i. "State": The state or commonwealth of the United States within whose exterior boundaries the Land is located. The term "State" also includes the District of Columbia, the Commonwealth of Puerto Rico, the U.S. Virgin Islands, and Guam.
- j. "Title": The estate or interest in the Land identified in Item 3 of Schedule A.

2. If all of the Schedule B, Part I—Requirements have not been met within the time period specified in the Commitment to Issue Policy, this Commitment terminates and the Company's liability and obligation end.

3. The Company's liability and obligation is limited by and this Commitment is not valid without:

- a. the Notice;
- b. the Commitment to Issue Policy;
- c. the Commitment Conditions;
- d. Schedule A;
- e. Schedule B, Part I—Requirements; and
- f. Schedule B, Part II—Exceptions; and

4. COMPANY'S RIGHT TO AMEND

The Company may amend this Commitment at any time. If the Company amends this Commitment to add a defect, lien, encumbrance, adverse claim, or other matter recorded in the Public Records prior to the Commitment Date, any liability of the Company is limited by Commitment Condition 5. The Company is not liable for any other amendment to this Commitment.

This page is only a part of a 2021 ALTA Commitment for Title Insurance [issued by First American Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I—Requirements; and Schedule B, Part II—Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

Form 50170653 (8-29-22)

5. LIMITATIONS OF LIABILITY

- a. The Company's liability under Commitment Condition 4 is limited to the Proposed Insured's actual expense incurred in the interval between the Company's delivery to the Proposed Insured of the Commitment and the delivery of the amended Commitment, resulting from the Proposed Insured's good faith reliance to:
 - i. comply with the Schedule B, Part I—Requirements;
 - ii. eliminate, with the Company's written consent, any Schedule B, Part II—Exceptions; or
 - iii. acquire the Title or create the Mortgage covered by this Commitment.
- b. The Company is not liable under Commitment Condition 5.a. if the Proposed Insured requested the amendment or had Knowledge of the matter and did not notify the Company about it in writing.
- c. The Company is only liable under Commitment Condition 4 if the Proposed Insured would not have incurred the expense had the Commitment included the added matter when the Commitment was first delivered to the Proposed Insured.
- d. The Company's liability does not exceed the lesser of the Proposed Insured's actual expense incurred in good faith and described in Commitment Condition 5.a. or the Proposed Amount of Insurance.
- e. The Company is not liable for the content of the Transaction Identification Data, if any.
- f. The Company is not obligated to issue the Policy referred to in this Commitment unless all of the Schedule B, Part I—Requirements have been met to the satisfaction of the Company.
- g. The Company's liability is further limited by the terms and provisions of the Policy to be issued to the Proposed Insured.

6. LIABILITY OF THE COMPANY MUST BE BASED ON THIS COMMITMENT; CHOICE OF LAW AND CHOICE OF FORUM

- a. Only a Proposed Insured identified in Schedule A, and no other person, may make a claim under this Commitment.
- b. Any claim must be based in contract under the State law of the State where the Land is located and is restricted to the terms and provisions of this Commitment. Any litigation or other proceeding brought by the Proposed Insured against the Company must be filed only in a State or federal court having jurisdiction.
- c. This Commitment, as last revised, is the exclusive and entire agreement between the parties with respect to the subject matter of this Commitment and supersedes all prior commitment negotiations, representations, and proposals of any kind, whether written or oral, express or implied, relating to the subject matter of this Commitment.
- d. The deletion or modification of any Schedule B, Part II—Exception does not constitute an agreement or obligation to provide coverage beyond the terms and provisions of this Commitment or the Policy.
- e. Any amendment or endorsement to this Commitment must be in writing.
- f. When the Policy is issued, all liability and obligation under this Commitment will end and the Company's only liability will be under the Policy.

7. IF THIS COMMITMENT IS ISSUED BY AN ISSUING AGENT

The issuing agent is the Company's agent only for the limited purpose of issuing title insurance commitments and policies. The issuing agent is not the Company's agent for closing, settlement, escrow, or any other purpose.

8. PRO-FORMA POLICY

The Company may provide, at the request of a Proposed Insured, a pro-forma policy illustrating the coverage that the Company may provide. A pro-forma policy neither reflects the status of Title at the time that the pro-forma policy is delivered to a Proposed Insured, nor is it a commitment to insure.

This page is only a part of a 2021 ALTA Commitment for Title Insurance [issued by First American Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I—Requirements; and Schedule B, Part II—Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

Form 50170653 (8-29-22)

9. CLAIMS PROCEDURES

This Commitment incorporates by reference all Conditions for making a claim in the Policy to be issued to the Proposed Insured. Commitment Condition 9 does not modify the limitations of liability in Commitment Conditions 5 and 6.

10. CLASS ACTION

ALL CLAIMS AND DISPUTES ARISING OUT OF OR RELATING TO THIS COMMITMENT, INCLUDING ANY SERVICE OR OTHER MATTER IN CONNECTION WITH ISSUING THIS COMMITMENT, ANY BREACH OF A COMMITMENT PROVISION, OR ANY OTHER CLAIM OR DISPUTE ARISING OUT OF OR RELATING TO THE TRANSACTION GIVING RISE TO THIS COMMITMENT, MUST BE BROUGHT IN AN INDIVIDUAL CAPACITY. NO PARTY MAY SERVE AS PLAINTIFF, CLASS MEMBER, OR PARTICIPANT IN ANY CLASS OR REPRESENTATIVE PROCEEDING. ANY POLICY ISSUED PURSUANT TO THIS COMMITMENT WILL CONTAIN A CLASS ACTION CONDITION.

AMENDED SCHEDULE B PART I – Requirements

File Number: 185365

All of the following Requirements must be met:

1. The Proposed Insured must notify the Company in writing of the name of any party not referred to in this Commitment who will obtain an interest in the Land or who will make a loan on the Land. The Company may then make additional Requirements or Exceptions.
2. Pay the agreed amount for the estate or interest to be insured.
3. Pay the premiums, fees, and charges for the Policy to the Company.
4. Documents satisfactory to the Company that convey the Title or create the Mortgage to be insured, or both, must be properly authorized, executed, delivered, and recorded in the Public Records.
5. Lien of Real Estate Excise Tax upon sale of said premises, or transfer of a controlling interest, if unpaid. As of the date herein, the excise tax rates are as follows:

State Excise Tax for real property classified as Timberland (RCW 84.34 or RCW 84.33) or Agricultural Land (RCW 84.34.020):

1.28% of the Selling Price

All other State Excise Tax:

1.10% of the selling price less than or equal to \$525,000.00

1.28% of the selling price from \$525,000.01 to \$1,525,000.00

2.75% of the selling price from \$1,525,000.01 to \$3,025,000.00

3.00% of the selling price over \$3,025,000.00

Local Excise Tax for Lewis County:

All locations (w/ the Exception of Pe Ell): .50%

Pe Ell .25%

In addition to the Excise Tax due, a state fee of \$5.00 will be charged on all taxable transactions, \$10.00 on all exempt transactions.

If you have questions or would like to request further information, please reach out to the Lewis County Treasurer's Office at 360-740-1115.

6. General taxes for 2025 are shown as EXEMPT on the general tax rolls.
Tax Parcel No : 018520-000-000 TCA 720
7. Said taxes as billed for the current year reflect an exemption as allowed under R.C.W. Chapter 84.36. Any change in ownership of said premises during the current calendar year may result in an increased assessment.

This page is only a part of a 2021 ALTA Commitment for Title Insurance [issued by First American Title Insurance Company. Form 50170653 (8-29-22)

8. The legal description in this commitment is based on information provided with the application and the public records as defined in the policy to issue. The parties to the forthcoming transaction must notify the title insurance company prior to closing if the description does not conform to their expectations.
9. Submission of evidence of identity and authority of the officers to execute the forthcoming transaction is required for review by this company prior to issuance of the title policy for this transaction.
Entity : LEWIS COUNTY
10. For each policy to be issued as identified in Schedule A, Item 2; the Company shall not be liable under this commitment until it receives a designation for a Proposed Insured, acceptable to the Company. As provided in Commitment Condition 4, the Company may amend this commitment to add, among other things, additional exceptions or requirements after the designation of the Proposed Insured. Title to vest in a person or persons not disclosed and when so, vested will be subject to matters disclosed by a search of the records against his or their names.
11. The Proposed Policy Amount(s) must be increased to the full value of the estate or interest being insured, and any additional premium must be paid at that time. An Owner's policy should reflect the purchase price or full value of the Land. A Loan Policy should reflect the loan amount or value of the property as collateral.

Form 50170653 (8-29-22)

AMENDED SCHEDULE B PART II - Exceptions

File Number: **185365**

Some historical land records contain Discriminatory Covenants that are illegal and unenforceable by law. This Commitment and the Policy treat any Discriminatory Covenant in a document referenced in Schedule B as if each Discriminatory Covenant is redacted, repudiated, removed, and not republished or recirculated. Only the remaining provisions of the document will be excepted from coverage.

The Policy will not insure against loss or damage resulting from the terms and conditions of any lease or easement identified in Schedule A, and will include the following Exceptions unless cleared to the satisfaction of the Company:

1. Any defect, lien, encumbrance, adverse claim, or other matter that appears for the first time in the Public Records or is created, attaches, or is disclosed between the Commitment Date and the date on which all of the Schedule B, Part I - Requirements are met.
2. Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records.
3. Any facts, rights, interest, or claims which are not shown by the Public Records but that could be ascertained by an inspection of the Land or by making inquiry of persons in possession thereof.
4. Easements, claims of easement or encumbrances that are not shown by the Public Records
5. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the Public Records.
6. Unpatented mining claims; (b) Reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, ditch or ditch right, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records; (d) Indian Tribal Codes or Regulations, Indian Treaty or Aboriginal Rights, including easements or equitable servitudes.
7. Any lien or right to a lien for services, labor, equipment or material or medical assistance, unless such lien is shown by the Public Records as of Date of Policy.
8. Any service, installation, connection, maintenance, construction, tap or reimbursement changes/costs for sewer, water, garbage or electricity.
9. Terms and provisions of instrument entitled DECLARATION OF COVENANT
Recorded : JUNE 12, 2025
Auditor's No. : 3623607

Title Guaranty Company of Lewis County

Title Guaranty Company of Lewis County Privacy Statement

July 1, 2007

We recognize and respect the privacy expectations of today's consumers and the requirements of applicable federal and state privacy laws. We believe that making you aware of how we use your non-public personal information ("Personal Information"), and to whom it is disclosed, will form the basis for a relationship of trust between us and the public that we serve. This Privacy Statement provides that explanation. We reserve the right to change this Privacy Statement from time to time consistent with applicable privacy laws.

In the course of our business, we may collect Personal Information about you from the following sources:

- From applications or other forms we receive from you or your authorized representative;
- From your transactions with, or from the services being performed by us, or affiliates, or others;
- From our internet websites;
- From the public records maintained by governmental entities that we either obtain directly from those entities, or from our affiliates or others; and
- From consumer or other reporting agencies.

Our Policies Regarding the Protection of the Confidentiality and Security of Your Personal Information

We maintain physical, electronic and procedural safeguards to protect your Personal Information from unauthorized access or intrusion. We limit access to the Personal Information only to those employees who need such access in connection with providing products or services to you or for other legitimate business purposes.

Our Policies and Practices Regarding the Sharing of Your Personal Information

We may share your Personal Information with our affiliates, such as insurance companies, agents, and other real estate settlement service providers. We also may disclose your Personal Information to agents, brokers or representatives to provide you with services you have requested.

In addition, we will disclose your Personal Information when you direct or give us permission, when we are required by law to do so, or when we suspect fraudulent or criminal activities. We also may disclose your Personal Information when otherwise permitted by applicable privacy laws such as, for example, when disclosure is needed to enforce our rights arising out of any agreement, transaction or relationship with you.

One of the important responsibilities of some of our affiliated companies is to record documents in the public domain. Such documents may contain your Personal Information.

Privacy Notice

Notice Last Updated: December 1, 2022

This Privacy Policy ("Policy") describes how First American Financial Corporation and its subsidiaries and affiliates (collectively, "First American," "we," "us," or "our") collect, use, store, and share your information when: (1) when you access or use our websites, mobile applications, web-based applications, or other digital platforms where this Policy is posted ("Sites"); (2) when you use our products and services ("Services"); (3) when you communicate with us in any manner, including by e-mail, in-person, telephone, or other communication method ("Communications"); and (4) when we obtain your information from third parties, including service providers, business partners, and governmental departments and agencies ("Third Parties").

This Policy applies wherever it is posted. To the extent a First American subsidiary or affiliate has different privacy practices, such entity shall have their own privacy statement posted as applicable.

What Type of Information Do We Collect About You? We collect a variety of categories of information about you. To learn more about the categories of information we collect, please visit <https://www.firstam.com/privacy-policy/>.

How Do We Collect Your Information? We collect your information: (1) directly from you; (2) automatically when you interact with us; and (3) from third parties, including business parties and affiliates.

How Do We Use Your Information? We may use your information in a variety of ways, including but not limited to providing the services you have requested, fulfilling your transactions, comply with relevant laws and our policies, and handling a claim. To learn more about how we may use your information, please visit <https://www.firstam.com/privacy-policy/>.

How Do We Share Your Information? We do not sell your personal information. We only share your information, including to subsidiaries, affiliates, and to unaffiliated third parties: (1) with your consent; (2) in a business transfer; (3) to service providers; (4) to subsidiaries and affiliates; and (5) for legal process and protection. To learn more about how we share your information, please visit <https://www.firstam.com/privacy-policy/>.

How Do We Store and Protect Your Information? The security of your information is important to us. That is why we take commercially reasonable steps to make sure your information is protected. We use our best efforts to maintain commercially reasonable technical, organizational, and physical safeguards, consistent with applicable law, to protect your information.

How Long Do We Keep Your Information? We keep your information for as long as necessary in accordance with the purpose for which it was collected, our business needs, and our legal and regulatory obligations.

Your Choices We provide you the ability to exercise certain controls and choices regarding our collection, use, storage, and sharing of your information. You can learn more about your choices by visiting <https://www.firstam.com/privacy-policy/>.

International Jurisdictions: Our Products are offered in the United States of America (US), and are subject to US federal, state, and local law. If you are accessing the Products from another country, please be advised that you may be transferring your information to us in the US, and you consent to that transfer and use of your information in accordance with this Privacy Notice. You also agree to abide by the applicable laws of applicable US federal, state, and local laws concerning your use of the Products, and your agreements with us.

We may change this Privacy Notice from time to time. Any and all changes to this Privacy Notice will be reflected on this page, and where appropriate provided in person or by another electronic method. **YOUR CONTINUED USE, ACCESS, OR INTERACTION WITH OUR PRODUCTS OR YOUR CONTINUED COMMUNICATIONS WITH US AFTER THIS NOTICE HAS BEEN PROVIDED TO YOU WILL REPRESENT THAT YOU HAVE READ AND UNDERSTOOD THIS PRIVACY NOTICE.**

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. **NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA), ARISING OUT OF OR IN ANY WAY CONNECTED WITH THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT.** Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Ecology's Statewide UST Site/Tank Report.

A review of the UST list, as provided by EDR, has revealed that there are 2 UST sites within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

ALLSITES: Information on facilities and sites of interest to the Department of Ecology.

A review of the ALLSITES list, as provided by EDR, and dated 04/21/2025 has revealed that there is 1 ALLSITES site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Other Ascertainable Records

MINES MRDS: Mineral Resources Data System

A review of the MINES MRDS list, as provided by EDR, and dated 06/04/2024 has revealed that there is 1 MINES MRDS site within approximately 0.25 miles of the target property.

| <u>Equal/Higher Elevation</u> | <u>Address</u> | <u>Direction / Distance</u> | <u>Map ID</u> | <u>Page</u> |

| LUND | | WSW 1/8 - 1/4 (0.163 mi.) | 2 | 13 |

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories. UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there is 1 UST FINDER site within approximately 0.25 miles of the target property.

Environmental Interest/Information System:

The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 06/26/2025

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/20/2024

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 06/26/2025

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

UST SEATTLE: Underground Storage Tank (UST) Records ? Residential Listing

Records of Seattle Fire Department (SFD) permits related to decommissioning of a residential heating oil tank, permit code 6103. A record with incomplete tank info indicates that the required follow-up report has not been received by SFD. Please note that SFD records begin in 1996 when state requirement was introduced. Decommissioning of a residential heating oil tank might have occurred prior to 1996, in which SFD will not have a record.

State and tribal institutional control / engineering control registries

INST CONTROL: Institutional Control Site List

The Environmental Covenants Registry is a list of sites that have implemented institutional controls as part of the remedy. Institutional controls are administrative or legal measures used to prevent activities that may compromise the integrity of a cleanup action. They are meant to prevent exposure to contamination remaining on site. Institutional controls may include environmental covenants (also known as "deed restrictions"), zoning restrictions, public health advisories, or other administrative tools. The most common institutional control is an environmental covenant. Environmental covenants are legal recorded documents that typically limit certain uses of the property, such as: Drilling a water supply well on the property. Disturbing pavement covering contaminated areas. Residential use of the property.

Data Release Frequency: No Update Planned

PTAP: PTAP Site Listing

A list of sites accepted into the Petroleum Technical Assistance Program. The Petroleum Technical Assistance Program (PTAP) expands the state's ability to respond to the high customer demand to clean up petroleum contaminated sites. Under the PTAP, the Pollution Liability Insurance Agency (PLIA) may provide informal site-specific technical consultations and issue written opinion letters to persons conducting independent remedial actions at qualifying petroleum cleanup sites. PLIA may provide these services under the authority of RCW 70.149.040(9) and the Model Toxics Control Act (MTCA), Chapter 70.149 RCW and Chapter 173-340 WAC.

Lists of state and tribal brownfield sites

BROWNFIELDS: Brownfields Sites Listing

A listing of brownfields sites included in the Confirmed & Suspected Sites Listing. Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use -- they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

Data Release Frequency: Quarterly

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilities name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories. UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

| Northeast Map: | 14730058 CENTRALIA, WA |
| Version Date: | 2020 |

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

| | |
|---|-------------------------|
| <u>Flood Plain Panel at Target Property</u> | <u>FEMA Source Type</u> |
| 5301020230B | FEMA Q3 Flood data |
| <u>Additional Panels in search area:</u> | <u>FEMA Source Type</u> |
| 5301020233B | FEMA Q3 Flood data |
| 5301020241B | FEMA Q3 Flood data |

NATIONAL WETLAND INVENTORY

| | |
|------------------------------------|--|
| <u>NWI Quad at Target Property</u> | <u>NWI Electronic Data Coverage</u> |
| ADNA | YES - refer to the Overview Map and Detail Map |

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

| | |
|----------------|------------|
| Search Radius: | 1.25 miles |
| Status: | Not found |

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

| <u>MAP ID</u> | <u>LOCATION FROM TP</u> | <u>GENERAL DIRECTION GROUNDWATER FLOW</u> |
|---------------|-------------------------|---|
| Not Reported | | |

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Salkum

Soil Surface Texture: silty clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

| Soil Layer Information | | | | | | | |
|------------------------|-----------|-----------|--------------------|--|---|--|--------------------|
| Layer | Boundary | | Soil Texture Class | Classification | | Saturated hydraulic conductivity micro m/sec | Soil Reaction (pH) |
| | Upper | Lower | | AASHTO Group | Unified Soil | | |
| 1 | 0 inches | 14 inches | silty clay loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt. | Max: 4 Min: 1.4 | Max: 6 Min: 4.5 |
| 2 | 14 inches | 51 inches | silty clay | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt. | Max: 4 Min: 1.4 | Max: 6 Min: 4.5 |
| 3 | 51 inches | 59 inches | silty clay | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt. | Max: 4 Min: 1.4 | Max: 6 Min: 4.5 |

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: Salkum

Soil Surface Texture: silty clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

| Soil Layer Information | | | | | | | |

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Ecology

Telephone: 360-407-6121

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Wells

Source: Department of Health

Telephone: 360-236-3148

Group A and B well locations.

Water Well Listing

Source: Public Utility District

Telephone: 206-779-7656

A listing of water well locations in Kitsap County.

Ecology Well Logs

Source: Department of Ecology

Telephone: 360-407-7294

Point geodatabase with a record for each Ecology well report. Points are located by quarter quarter section centroid.

Points contain all well report types including water wells, resource protection wells, and decommissioned wells.

OTHER STATE DATABASE INFORMATION

Oil and Gas Well Listing

Source: Department of Natural Resources

Telephone: 360-902-1450

Locations that represent oil and gas test well sites in Washington State from 1890 to present.

RADON

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.
